INTRODUCTION

This document brings together a wide array of statistical information gathered from many sources, and provides a comprehensive demographic and economic profile for the Kitimat–Stikine Regional District. It forms part of a set of Regional District profiles produced by ***BC STATS***. Each regional profile includes details of its municipalities and postal areas, depending on the data source. If you need geographically focused information, the profiles provide a wealth of information in one convenient place.

Each profile includes an **Executive Summary** composed of appropriate pages from another ***BC STATS*** regional release called *Quarterly Regional Statistics*. This section will usually provide more current data as it concentrates on series that are updated monthly or quarterly. *Quarterly Regional Statistics* includes similar tables for British Columbia (with comparisons to Canada), all development regions (which are groupings of regional districts) and all regional districts. An annual subscription to the print edition is $100 plus G.S.T. *QRS* is also accessible to subscribers to the secure section of our Web site. For a fee of $200 per year (plus G.S.T.) subscribers have access to the latest issue of approximately a dozen statistical periodicals. Downloadable files are in Adobe's PDF format.

SECTION E **ECONOMIC AND SOCIAL INDICATORS**, includes in Chapter 6, a Socio-Economic Profile that is exerpted from a *BC STATS* regional release. *Socio-Economic Profiles* repeats the same set of tables and charts for each regional district with provincial comparisons. Complete background data tables are included in the publication. It is published in the Spring of each year and costs $200 plus G.S.T. A complete set of socio-economic profiles is available without charge on our web site.

QRS

Skeena-Queen Charlotte
Regional District

Quarterly Regional Statistics
Interim Report, Fourth Quarter, 2002

1. General Economy

Municipalities in Regional District: Masset, Port Clements, Port Edward, Prince Rupert

Fishing and forestry are the primary economic activities in this region. The Prince Rupert area has the largest concentration of fish processing facilities in the province outside the Vancouver region.

Developments affecting this region include cutbacks in the forest sector and possible further restrictions imposed on the fishing industry to avoid depletion of salmon stocks. The Prince Rupert area has seen some movement from the area in recent years and this out-migration is likely to continue if there is no improvement in the resource sectors. Skeena Cellulose has been sold but the new owners are still in negotiations with the workers. Off-shore oil drilling may start in several years and would have a significant impact on population.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

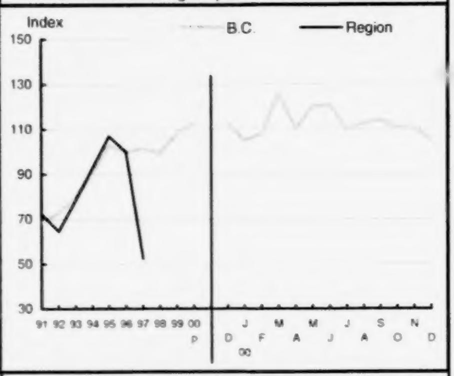
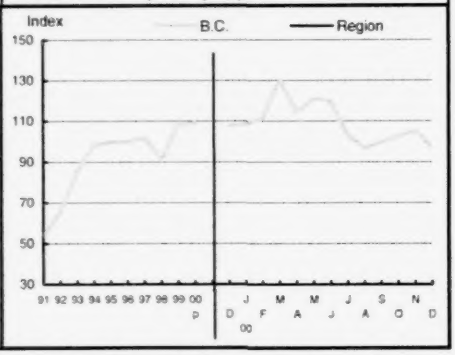
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

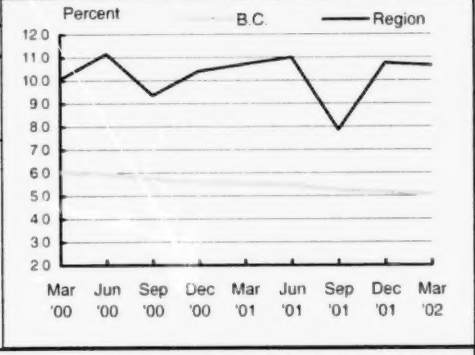
All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996. - Data too small to release.

11 Employment Insurance (was UI)

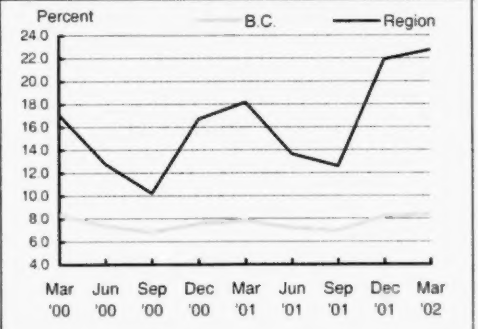
Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



QRS

Skeena-Queen Charlotte
Regional District

13 Demographics

This region has generally experienced net migration outflows over the last 25 years. The natural increase (i.e., the excess of births over deaths) has offset migration outflows, but in some years there has been a population decline.

The gender ratio for this area is substantially weighted in favour of males, in contrast to the province as a whole, which has more females than males. This is likely due to the dependence on male-dominated resource industries. Since men tend to have lower life expectancies than women, the median age at death is lower than the provincial median. The overall median age is also lower than for the province as a whole and this is reflected in the ratio of children (aged 17 and under) to working age population (aged 18 to 64), which is much higher than the provincial ratio, and the ratio of elderly (aged 65 and over) to working age population, which is much lower than the provincial ratio. Also, the total fertility rate in this region is substantially higher than the provincial rate.

14 Projection

This region has generally experienced net outflows of migrants and it is expected that this trend will continue although not to the same extent. Deaths will likely begin to exceed births towards the end of the projection period, and in combination with the out-migration, should result in a negative population growth rate.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

Appendix - Notes to Data Tables

Geography

This report is organized by geographic region. British Columbia comprises eight **development regions**, which in turn are composed of varying numbers of **regional districts**. The same set of data tables are presented for: the province of British Columbia; each development region, sorted in numeric order according to the code number, and; each regional district, sorted in alphabetic order.

Regional districts are generally equivalent to Statistics Canada's (SC's) census divisions. Readers are cautioned that regional district boundaries are sometimes subject to change. Langley City and Langley District Municipality were transferred to Greater Vancouver Regional District from Central Fraser Valley Regional District in 1989. Peace River-Liard Regional District has been split into Peace River Regional District and Fort Nelson-Liard Regional District. This report now publishes data for the two new northern RDs. The data for the old Peace River-Liard RD will be the same as for Northeast Development Region. In the Spring of 1999 the name of Fort Nelson-Liard RD changed to Norther Rockies RD.

In 1995, a number of changes occurred in the lower mainland: the municipalities of Maple Ridge and Pitt Meadows were moved from Dewdney-Alouette RD into the Greater Vancouver RD. In January 1996, the remnants of Dewdney-Alouette RD amalgamated with the remnants of the Central Fraser Valley RD (Abbotsford and Matsqui) and the Fraser-Cheam RD to form Fraser Valley RD. While this report is organized according to the new boundaries in the Fraser valley, Tables 5 and 8 within RDs 9, and 15 are presented on the basis of add-ups of the most substantial pieces of the former jurisdictions and Table 6 incorporates a noted break in the series.

The list below shows the relationship of regional districts to development regions. The associated census division number is provided for each regional district.

DR 1: Vancouver Island/Coast
- 23 Alberni-Clayoquot
- 17 Capital
- 45 Central Coast
- 25 Comox-Strathcona
- 19 Cowichan Valley
- 43 Mount Waddington
- 21 Nanaimo
- 27 Powell River

DR 2: Mainland/Southwest
- 09 Fraser Valley
- 15 Greater Vancouver
- 31 Squamish-Lillooet
- 29 Sunshine Coast

DR 3: Thompson/Okanagan
- 35 Central Okanagan
- 39 Columbia-Shuswap
- 37 North Okanagan
- 07 Okanagan-Similkameen
- 33 Thompson-Nicola

DR 4: Kootenay
- 03 Central Kootenay
- 01 East Kootenay
- 05 Kootenay Boundary

DR 5: Cariboo
- 41 Cariboo
- 53 Fraser-Fort George

DR 6: North Coast
- 49 Kitimat-Stikine
- 47 Skeena-Queen Charlotte

DR 7: Nechako
- 51 Bulkley-Nechako
- 57 Stikine

DR 8: Northeast
- 55 Peace River
- 59 Northern Rockies

Table 2: Economic Structure

This table is based on SC's **Business Register**, the central database which is used to frame all their business surveys.

Appendix - Notes to Data Tables

This database identifies business **establishments**, which are normally company locations or plants that are able to separately report basic financial statistics. For further information on the definition of an establishment, interested readers are referred to SC's *North American Industry Classification System (Canada 1997)* manual, catalogue 12-501.

Changes to the Business Register in recent years have broadened the coverage of the file. A new 'indeterminate' category of employment size includes sole proprietorships and those firms without paid employment.

Table 3: Employment and unemployment rate (LFS)

The data for this table comes from the Labour Force Survey (LFS) by Statistics Canada. The series presented here are three-month moving average, actual. This presentation minimizes the volatility inherent in small samples and sample rotation. Data are only available for BC, development regions and the Census Metropolitan Areas (CMA) of Vancouver and Victoria. Vancouver CMA is identical to the 1996 Census boundaries of Greater Vancouver Regional District. Victoria CMA is equivalent to Capital Regional District **less** Subdivision A (the Gulf Islands) and Subdivision D (Port Renfrew) and the Indian Reserves associated with these areas.

Table 4: Retail Sales

We publish SC figures for British Columbia and Vancouver Census Metropolitan Area and calculate the difference as "Rest of Province". Since the new boundaries for Greater Vancouver Regional District coincide with the Vancouver CMA boundaries, the GVRD data in *QRS* is for the new RD boundaries.

SC publishes estimates of monthly and quarterly retail sales for each province by up to 16 **retail trade groups**. This estimate includes only retail sales by firms that are SIC (Standard Industrial Classification) coded to **major group 60. Retail Trade**. The province and Greater Vancouver retail trade totals used in this report are these published numbers, based on the **monthly survey**. The annual survey results differ from the monthly estimates and are not used in this report.

Table 5: Manufacturing Principal Statistics

This table provides selected **principal statistics** based on surveys conducted by SC. Similar sub-provincial data was published by SC in the catalogued publication 31-209 up to and including the 1986 reference year. SC has now released for publication principal statistics for 1992. We have suppressed data where there is the possibility of disclosure of confidential information. There are some differences in the detail of information available to *BC STATS* and to SC. In addition, the suppression preferrences chosen, at our request, have worked against some of the data that *QRS* chooses to publish. More specific industry detail is preserved at the expense of major group roll-ups. This has resulted in the complete suppression of six regional districts and hence the four development regions that include them for the 1992 year and later. As the sub-provincial data is available on an annual basis only, it is supplemented by annual and monthly shipments for the same industries at the provincial level. Monthly shipment data are published in SC 31-001 and, in more detail on CANSIM, which is the electronic data base we used to update the series:

D315351 - Canada, total, all manufact'ing
D315497 - Canada, wood industries
D321241 - B.C., total, all manufacturing

Appendix - Notes to Data Tables

D321243 - B.C., food industries
D321387 - B.C., wood industries
D321390 - B.C., sawmill & planing mill
D321431 - B.C., fabricated metal products

Table 6: Building Permits

SC collects building permit data from municipal and regional district offices. Data for many rural areas is incomplete or non-existent. Further, not all building projects require a building permit, and not all projects with a permit proceed or are completed.

As in other series, when at least six months data are available for the current year, a projection of the annual total is provided. However, as non-residential permits are subject to wide variation, projections of industrial, commercial, and institutional & government permits are limited to 130% of the current year-to-date value whenever the current year-to-date figure is more than double the figure for the same period in the previous year. The 130% ceiling has been arbitrarily chosen as suitable when data for six months remain to be released in the current year. As the end of the year is approached a lower ceiling is appropriate. The ceiling is reduced 5% per month as the number of months remaining until the end of the year decreases.

Table 7: Tourism Room Revenue

This table is intended to measure **tourism activity** but includes business travel and other uses of accommodation. The data is based on remittances of hotel room tax to the Ministry of Finance and Corporate Relations. Not all accommodation activity is measured as the statutory requirement is that the tax must be remitted when the establishment has four or more rooms, and no tax is required for a duration of stay of at least one month. This has the effect of excluding many **bed and breakfasts** and **residential hotels**.

Table 8: Incorporations

Tables 8 and 9 are intended to provide an indication of business formation and failure.

Data on incorporations comes from the Ministry of Finance and Corporations. The weakness on the formation side is the failure to include partnerships, extra-provincially incorporated companies, and new sole proprietorship business ventures.

Table 9: Business and Consumer Bankruptcies

We receive bankruptcy data from the Office of the Superintendent of Bankruptcy, Government of Canada, Ottawa. The data are geographically coded to urban centres where appropriate and the balance to a 'non-urban' category. Data for Vancouver and Victoria are for the Census Metropolitan Areas.

Bankruptcy is an extreme form of business failure. Most unsuccessful businesses simply wind down and cease operations. While the level of these series may be of questionable value, the charted region vs. province comparison does provide some useful information.

Table 10: BC Benefits

The **basic BC Benefits** caseload is used to generate recipient data by age and family structure. The BC Benefit program replaced the Income Assistance program in 1996. We have chosen recipient groups that match the previously published Income Assistance data to achieve continuity.These figures include only a subset of total BC Benefits. INCLUDED are Youth Works, Welfare to Work, and Age 60-64. EXCLUDED are Disabled Persons, Children in the Home of a Relative, and

QRS

Appendix - Notes to Data Tables

OAS/Seniors. A recipient is defined in these reports as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include aboriginal people living on reserve. A dash '-' identifies data too small to release.

Table 11: Unemployment

Measures of regional unemployment are only available historically for nine **economic regions** defined by SC. Starting with January, 1995, the **Labour Force Survey** (LFS) is compiled for the eight development regions defined by the provincial government. The LFS samples appropriately in these regions to derive local measures of unemployment. As a proxy for small area unemployment rates, *BC STATS*, using data from Human Resources Development Canada (HRD), estimates the ratio of Employment Insurance beneficiaries as a percent of the working age population in a region. (See also, Table 2)

Table 12: Basic BC Benefits and/or Employment Insurance

The data described for tables 10 and 11 are combined to provide a more complete picture of regional reliance on the "safety

Beginning in June 1997, the combined BC Benefit+EI rate in this report has been adjusted to count only once those persons receiving both Employment Insurance and BC Benefits. Therefore use caution when comparing data to pre June 1997 data. This adjustment resulted in an overall decrease of 0.3 percentage points to the BC rate in June 1997.

Table 15: Demographic Characteristics

Population growth can be a measure of the economic well being of an area. *BC STATS* projects population for **local health areas** (approx. 80 in the province) and for **regional districts**. This data is available in considerable detail in print and electronic formats. See the description of regional data products elsewhere in this report.

SECTION A

GEOGRAPHY AND CLIMATE

1. MAPS

A selection of maps to assist in associating data with the correct boundaries. It is not possible to present all the information based on a consistent set of geography.

2. CLIMATE

Climate norms for selected locations within the District. Note that weather can vary markedly by elevation.

SECTION A GEOGRAPHY & CLIMATE

CHAPTER 1 MAPS

The maps included in this volume are intended to assist the data user in understanding the geographic area to which the data relates.

DEVELOPMENT REGIONS

The Provincial government in the late 1980's created these regions. Data presented on this basis can be found in *MAJOR PROJECTS INVENTORY*.

REGIONAL DISTRICTS

The Regional Districts, created in the late 1960's are administrative regions that have responsibilities for common areas of interest to communities. The boundary changes which have occurred over the last few years are: Peace River-Liard was split at the 58th parallel, the northern portion becoming Fort Nelson-Liard and the southern portion, Peace River. At the most northwest corner there was also a minor boundary change with the Stikine Region. In 1989, the City and the Township of Langley were annexed to the Greater Vancouver Regional District. In 1995, the Fraser Valley Regional District was created from an amalgamation of three regional districts: Central Fraser Valley, Fraser Cheam and Dewdney-Alouette. Pitt Meadows and Maple Ridge joined the GVRD (from Dewdney Alouette) in July 1995. All chapters with the exception of the *MAJOR PROJECTS INVENTORY* and *REGIONAL TOURISM* display information on this basis.

DETAILED REGIONAL DISTRICT MAPS

Maps representing different types of administrative boundaries are enclosed in this profile. Regional districts, also called Census Divisions, are areas where Statistic Canada reports Census data. Census subdivisions (also known as municipalities, reserves, and unorganized areas, are outlined in the *Census of Population and Housing*. Data below the Regional District level are available in the chapters - *CENSUS OF POPULATION AND HOUSING, HOUSEHOLD SPENDING, REGIONAL & COMMUNITY FACT SHEETS, NEIBOURHOOD INCOME AND DEMOGRAPHICS. ECONOMIC DEPENDENCY AND LABOUR FORCE INCOME, EMPLOYMENT INSURANCE STATISTICS, BUILDING PERMITS BY TYPE, PERSONAL INCOME BY SOURCE, CENSUS OF AGRICULTURE, AND LABOUR FORCE BY INDUSTRY.*

OTHER TYPES OF GEOGRAPHIC AREAS

Several other types of geographic areas are used for presenting data. Postal areas (known as Forward Sortation Areas—FSA's) are used in the *NEIGHBOURHOOD INCOME AND DEMOGRAPHICS* chapter. Maps are provided in that section. They can also be acquired from local Post Offices. Vital Statistics and Population Projections are available on a Local Health Area basis.

THEMATIC MAPS

BC STATS is able to produce colour or black & white maps, plotting characteristics of population and housing from the Census. These are available for all standard and non-standard (customized) areas. Call 387-0335 for details and costs.

OTHER MAPS AVAILABLE

MAPS B.C. offers aerial photography and satellite photos. To obtain national topographic maps and other special map series the contact in Victoria is- Crown Publications 521 Fort Street, and in Vancouver - World Wide Books and Maps 736A Granville Street.

SECTION A GEOGRAPHY & CLIMATE

CHAPTER 2 CLIMATE

SOURCE OF INFORMATION

Climatic data are collected at stations by staff and volunteers with the Atmospheric Environment Service of Environment Canada. The locations shown in this report are from "Canadian Climate Normals, 1961-1991, British Columbia" published by the Atmospheric Environment Service of Environment Canada. Additional information is available from the Climate Products and Publications Division, Canadian Climate Centre, 4905 Dufferin St. Downsview, Ontario M3H 5T4.

CLIMATE NORMALS

"Normals" is the term commonly used for values of climatic elements averaged over a fixed, standard period of years. Except where noted "extreme", "date" or "direction", values of the climate elements in these tables are averages for the period 1961-1991, or for a portion of that period no shorter than 20 years.

TEMPERATURE

Temperature measures are expressed in degrees Celsius. For conversion to Fahrenheit multiply the degrees Celsius by 1.8 and add 32.

DEGREE DAYS

Degree-days for a given day represent the number of Celsius degrees that the mean temperature is above or below a given base. For example, heating degree-days are the number of degrees below 18C. If the temperature is equal or greater than 18, then the number will be zero. Values above or below the base of 18C are used primarily to estimate the heating and cooling requirements of buildings.

PRECIPITATION

Rainfall includes rain drizzle, freezing rain and hail. Snowfall measures the depth of freshly fallen snow. The water equivalent of snowfall is usually calculated by dividing by 10 (some stations measure melted snowfall for greater accuracy). Rainfall is measured in mm (millimetres), snowfall in cm (centimetres) and total precipitation in mm (millimetres). Millimetres are converted to inches by dividing by 25.4; centimetres are converted to inches by dividing by 2.54.

SUNSHINE

Bright sunshine observations are made using the Campbell-Stokes sunshine recorder, first developed in 1863. Values given in the tables are the average number of hours per month or year.

PRESSURE

Station pressure is the force exerted on the earth's surface by a column of air of unit cross-sectional area extending from the surface of the earth to the outer limit of the atmosphere. It is given in kilopascals: one kilopascal is equal to 10 millibars, 0.2953 inches of mercury, or 0.145 pounds per square inch.

MOISTURE

Vapour pressure is the pressure exerted by the moisture in the air. It increases with both atmospheric temperature and moisture content. It is related to relative humidity in that the latter is the ratio of the actual value of vapour pressure to its value if the air were saturated at the same temperature.

DAYS WITH RAIN, DAYS WITH SNOW

A day with measurable rain is one on which at least 0.2 mm of rain has fallen; days with snow is one on which at least 0.2 cm of snow has fallen.

CONTACTS DIRECTORY

1. **CONTACTS DIRECTORY**

   An address book to assist in accessing information and services in the Regional District.

SECTION B CONTACTS DIRECTORY

CHAPTER 1 CONTACTS DIRECTORY

There are a variety of information services available to the businessperson, both in and outside of government. The Contacts Directory has brought together a listing of provincial and local agencies. In addition, most communities will be served by a public library.

A number of Provincial Ministries with responsibilities in particular sectors have offices throughout the province (e.g. Forests and Agriculture, Fisheries and Food). Check the blue pages of local telephone books for the phone number.

For help in locating the correct government office, both the federal and provincial governments operate an information and referral service.

PROVINCIAL BUSINESS DEVELOPMENT ORGANIZATIONS

Canada-British Columbia Business Service Centre
601 West Cordova Street
Vancouver, BC V6B 1G1
Phone: (604) 775-5525
Toll-free: 1 800 667-2272
Fax: (604) 775-5520

The centre offers a broad range of services and publications aimed at those wishing to explore business opportunities.

Innovation BC
Suite 450, 1122 Mainland Street
Vancouver, BC V6B 5L1
Phone: (604) 684-0647
Fax: (604) 689-4198

The centre provides a confidential service to innovators, entrepreneurs and companies who wish to explore the commercial potential of their innovations.

British Columbia Purchasing Commission
Suite 1123, 409 Granville Street
Vancouver, BC V6C 1T2
Phone: (604) 660-3042
Fax: (604) 660-0110

Contact the Purchasing Commission if you wish to sell products and/or services to the provincial government.

PEOPLE AND MARKETS

1. CENSUS OF POPULATION AND HOUSING

The results of the Census, taken every five years, are the most complete and accurate demographic profile available.

2. SURVEYED HOUSEHOLD SPENDING

Household expenditures for Vancouver Census Metropolitan Area (CMA), Victoria CMA and British Columbia.

and

DWELLING CHARACTERISTICS & HOUSEHOLD EQUIPMENT

Type, tenure and age of dwellings as well as the presence of certain household equipment for Canada, British Columbia, Vancouver CMA and Victoria CMA.

3. MIGRATION COMPONENTS

The flow of persons between Census Divisions and: other countries; other provinces, and; other Census Divisions.

4. VITAL STATISTICS

Births, deaths and marriages are counted events which can signal market opportunities.

5. NEIGHBOURHOOD INCOME & DEMOGRAPHICS

Although not as complete as the Census, this annually released data is an especially valuable indication of trends as Census data becomes more dated. Available for postal coded areas.

SECTION C PEOPLE & MARKETS

CHAPTER 1 CENSUS OF POPULATION AND HOUSING

Whether one is looking at consumer markets, demographic trends, special population groups, available labour supply or preparing for original market research, the Census of Population and Housing is probably the single most important source of data in Canada. Every five years, the population of Canada is asked to respond to a set of questions to determine the social, economic, and housing characteristics of our population. Because virtually every household is surveyed it is possible to produce data for small neighbourhood areas, as well as rural communities, metropolitan areas, and the provinces and country as a whole.

Characteristics such as age, marital status, languages, ethnic origin, household and family status help to develop a picture of a population group. Incomes, occupation, level of education and mobility further fill out the picture. Housing characteristics such as the structural type, ownership and age of the building describe that market, particularly when cross classified with demographics of the population. Looking over time helps one to identify shifts and trends in the population and to formalize ideas about future growth.

SOURCES OF INFORMATION

The Census data is collected by Statistics Canada and published in a large number of publications and datafiles, focusing on particular characteristics or geographic regions. Publications made available from Statistics Canada (666-3691/1-800-263-1136 in Vancouver) can be either purchased or used in many public, college, and university libraries. Data can also be obtained from the Statistic Canada website—http://www.statcan.ca.

ADDITIONAL DATA AVAILABLE

Census profiles for non standard or user-defined areas can be produced from a desktop demographics package titled "PCensus", developed by the Vancouver firm, Tetrad Computer Applications. With this system, *BC Stats* can produce similar data tables for user-defined geographic regions. Municipal boundaries often do not define trading areas well. PCensus allows us to easily overcome this problem to fit the geography to meet your needs. A study area can be compared to reference areas (perhaps the trading area of a similar existing business) to permit easier analysis. Please call for further information - *BC Stats* at (250) 387-0327.

TECHNICAL NOTES

Understanding Census concepts is important in interpreting the data; for example households and families are measuring specific population groups which are not the same. Geographic jargon used by the Census is often unfamiliar. Please see the Explanatory Notes for explanations of the most commonly used terms. For further information call *BC Stats* or Statistics Canada.

2001 Census of Population and Housing

At the time of printing (September 2002) the results of the 2001 Census were still largely unpublished. The following tables provide all available characteristics.

Characteristics for areas with small populations are suppressed to preserve the confidentiality of respondents. Furthermore, all data, with the exception of that in the EXPOP table is randomly rounded to multiples of 5 for similar reasons. Data for British Columbia, the Census Division (usually Regional District) total, and the sub areas that conform to the Standard Geographic Classification (SGC) are provided by Statistics Canada and are rounded at that level of geography. The SGC Total and the Reserve Total are calculated by the program that assembled these data and therefore include additional variability from what could be published if the rules around suppression and rounding were to be applied to the totals rather than the components. For most intents and purposes the difference between the RD total and the SGC Total will be inconsequential.

Unorganized areas

Census Subdivisions (commonly lettered A through ?) are based on Regional District Electoral Areas (RDEA) for the 2001 Census. These areas DO NOT match the geography of the similarly identified Census Subdivisions of previous censuses.

Identification of incorporated municipalities

C = City, T = Town, VL = Village, DM = District Municipality, IM = Island Municipality, IGD = Indian Government District. Sechelt Indian Government District is split between Sunshine Coast and Powell River Regional Districts.

Incompletely enumerated Indian Reserves

On some reserves in the 2001 Census, enumeration was not permitted or was interrupted before it could be completed. Moreover, for some Indian Reserves and Indian Settlements the quality of the enumeration was considered inadequate. These geographic areas (a total of 3) are called incompletely enumerated Indian Reserves and Indian Settlements. Data for 2001 are not available and therefore not included for:
Esquimalt, Marble Canyon 3, and Pavillion 1.

CENSUS GLOSSARY

INSTITUTIONAL POPULATION

Population living in collective dwellings with no other usual place of residence (e.g. bunkhouses, chronic hospitals, student residences, prisons etc).

MOTHER TONGUE

Refers to the first language learned in childhood and still understood by the individual at the time of the Census.

OFFICIAL LANGUAGE

Refers to the ability to conduct a conversation in English and French, the official languages of Canada.

HOME LANGUAGE

Refers to the language spoken at home by the individual at the time of the Census. If more than one language was spoken, the language spoken most often was to be reported.

ETHNIC ORIGIN

Refers to the ethnic or cultural group(s) to which the respondent's ancestors belong. Ethnic or cultural origin refers to the ethnic "roots" or ancestral background of the population, and should not be confused with citizenship or nationality. Multiple origins refers to individuals who report mixed ethnic ancestry.

HIGHEST LEVEL OF SCHOOLING

Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or non-university completed.

POST-SECONDARY QUALIFICATION

Refers to the predominant discipline or area of learning or training of a person's highest post-secondary degree, certificate or diploma.

DWELLING

Refers to an occupied private dwelling in which a person or group of persons are permanently residing. Also included are dwellings whose usual residents are temporarily absent on Census day.

IMMIGRANT

Refers to a person given the right by immigration authorities to live in Canada permanently (i.e. a landed immigrant).

MOBILITY STATUS

Refers to a person's usual place of residence on Census Day and his/her place of residence one year or five years earlier.
-Non-mover: living in the same dwelling.
-Mover: living in a different dwelling.
-Non-migrant: mover living within the same census subdivision (CSD).
-Migrant: mover living in a different CSD within Canada or living outside Canada.

PRIVATE HOUSEHOLD

Refers to a person or group of persons living in the same dwelling. The dwelling cannot be of a collective or institutional nature. A household may be made up of one or more families, a person living alone or a group of unrelated individuals. The number of households equals the number of occupied private dwellings.

CENSUS FAMILY

Refers to a couple with or without children, or one parent with offspring. This definition restricts relationships among co-residing family members to those of husband-wife/common-law partners, and parent/never-married child(ren). No other related persons (eg. a divorced son/daughter or a widowed parent) are considered part of the census family, even when they reside in the same dwelling. Generally speaking, there are fewer census families than households because of the existence of non-family households such as single residents (one person households) or unrelated co-habitants.

LABOUR FORCE

Refers to persons of working age (15 years and over) who, in the week prior to June 4, 1991, were either employed or unemployed (seeking work). The remainder of the working age population is classified as "not in the labour force".

INCOME

Refers to money income received during the calendar year 1995, including employment income, government transfer payments, investment income and retirement income.

1996 [illegible]nsus Profile Notes

1. Based on 1996 boundaries
2. Effective for the 1991 and 1996 Census, non-permanent residents were enumerated and included in the total population counts.
3. In 1996 Aboriginal people married according to traditional customs were considered to be legally married.
4. Non-relatives may be present.
5. These non-relatives must constitute a census family.
6. Average calculated using the total population in private households and the total number of collective dwellings.
7. Non-relatives may be present.
8. These non-relatives must constitute a census family.
9. Average calculated using the total number of never-married sons and daughters at home and the total number of families.
10. Includes mobile homes and other movable dwellings such as houseboats and railroad cars.
11. Band housing was created in 1991, replacing the "On Reserve" category in the 1986 census.
12. Includes persons born in a province other than the province of residence, as well as persons born outside Canada who have Canadian citizenship by birth.
13. Refers to persons who, at the time of the census, held a student or employment authorization, Minister's permit, or who were refugee claimants, as well as family members living with them.
14. Includes the first four months only of 1996.
15. The 1996 Census asked both an ancestry and identity question for aboriginal status. This data is based on the identity question and is not directly comparable to previous census years.
16. Includes those who identified themselves as registered Indians and/or Band members without self-reported Aboriginal response.
17. The 1996 census question on Ethnic ancestry was a write-in response and is not directly comparable to previous census years.
18. Includes persons who worked since January 1, 1995 and who were employed or unemployed in the reference week. Excludes those who have never worked or who last worked before 1995.
19. Refers to Experienced Labour Force.
20. Refers to persons who do not go from home to the same workplace location at the beginning of each shift. Includes building and landscape contractors, independent truck drivers, salespersons, etc.
21. Attendance at a school, university or college (between September 1995 and May 14,1996) where only credited courses towards a certificate, diploma or degree are allowed.

Source: Statistics Canada

22. Refers to the possession of either a trades certificate or diploma, or other non-university certificate, regardless of whether other educational qualifications are held or not.
23. Non-movers are persons who, on Census Day, were living at the same address which they occupied one year earlier. A mover lived at a different address.
24. Movers lived at different addresses but in the same census subdivision (**non-migrant mover**) than they lived in one year earlier.
25. Migrant movers either lived in a different CSD one year earlier (**internal migrants**) or outside of Canada (**external migrants**).
26. In addition to footnote 26, also includes income received from Child Tax benefits, OAS and GIS; CPP or QPP; UI; other government sources; dividends, bonds, savings certificates, and other investment income; and retirement pensions, superannuation and annuities, including those from RRSPs and RRIFs; other money income.
27. The average income can be calculated by unrounded data by dividing the aggregate income by the number of individuals or census groups.
28. Median income of a specific group is that amount which divides their income size distribution into two halves (below and above the median).
29. Total income received (by persons aged 15 and over) during the 1995 calendar year from wages and salaries (before deductions), net income from unincorporated business (non-farm), professional fees, and net farm self employment income.
30. Worked full-time weeks of 30 hours or more per week, in 1995.
31. Refers to persons with a part-time job for part of the year or a full-time job for another part of the year.
32. Relative share of each income source expressed as a percentage of the aggregate total income for that group or area. Due to rounding percentages may not add to 100%.
33. Based on all households with 1995 household income greater than zero.
34. Based on one-family households with 1995 income greater than zero.
35. Based on all private households with 1995 household income greater than zero.
36. Based on one-family households with 1995 income greater than zero.
37. Refers to two or more persons living in the same dwelling and are related to each other by blood, marriage, common-law or adoption.
38. Refers to the position of an economic family or unattached individual in relation to Statistics Canada low income cut-offs (LICO).
39. The incidence of low income is the percentage of a specific group below the low-income cut-offs.
40. Includes Canadian citizenship by birth and Canadian citizenship by naturalization.
41. Reserves with a population of less than 50 are not included in the "Indian reserve totals".

- Indicates calculations not available.

1991 Census of Population and Housing - Notes and Footnotes

Note Comparison of the 1991 Census data with data from earlier censuses is affected by a change in the definition of the 1991 Census population. Persons in Canada on student authorizations, employment authorizations, Minister's permits, and as refugee claimants were enumerated in the 1991 Census but not in previous censuses. These persons are referred to as non-permanent residents.

(1) Based on 1991 area.

(2) Refer to the note above on comparison of the 1991 Census data with data from earlier censuses.

(3) For historical and statutory reasons, shelter occupancy on Indian reserves does not lend itself to the usual classification by standard tenure categories (i.e. "owned" and "rented"). Therefore, in 1991, a special category, "Band Housing", has been created. In 1986, dwellings on Indian reserves were classified in the "On Reserve" category. Previous to 1986, dwellings on Indian reserves were classified as being owned or rented.

(4) Includes mobile homes and other movable dwellings such as households and railroad cars.

(5) Husband-wife families are comprised of families of now-married couples and families of common-law couples.

(6) The average number of never-married sons and daughters at home per family is calculated using the total number of never-married sons and daughters at home and the total number of families.

(7) With the exception of line 1 (directly above), all characteristics exclude institutional residents and are based on weighted sample data (20%). In some instances, due to weighting factors, it is possible for small areas to have an "estimated population excluding institutional residents" (line 2) higher than the "population including institutional residents" (line 1).

(8) Includes the single responses of French, Acadian and Quebecois.

(9) Includes the single responses of Inuit, Metis and North American Indian.

(10) A multiple response occurs when a respondent provides two or more ethnic origins.

(11) Includes Canadian citizenship by birth and Canadian citizenship by naturalization.

(12) Includes persons born outside the province as well as persons born outside Canada who have Canadian citizenship by birth and ,therefore, will not have immigrated to Canada.

(13) "Other Asia" includes the Middle East and excludes India.

(14) Refers to persons who hold a student authorization, employment authorization or Minister's permit, or who are refugee claimants.

(15) Includes the first five months only of 1991.

(16) Population residing in Canada, excluding all persons in collective households and Canadians (military and government personnel) in households outside Canada.

(17) Includes "Never attended school or attended kindergarten only".

(18) Refers to courses completed at postsecondary non-university institutions which normally require a secondary school graduation certificate or equivalent for entrance, AS WELL AS to other courses in related or like institutions (such as private trade schools or adult vocational centres) which may NOT require secondary school graduation for entrance.

(19) Includes "Other non-university certificate or diploma" and "Trades certificate or diploma".

(20) For females 15 years and over in private households only.

(21) The "Not applicable" category refers to unemployed persons 15 years and over who have never worked or who had worked only prior to January 1, 1990. For these persons, the industry, occupation and class of worker questions did not apply (this category is also referred to as the "Inexperienced labour force").

(22) Occupation major group and industry division totals include computer assignment of the "Not stated" categories. These assignments are based on selected socio-economic characteristics.

(23) Applies to owner-occupied non-farm, non-reserve dwellings only.

(24) Applies to tenant-occupied non-farm, non-reserve dwellings only.

(25) Includes households in tenant-occupied non-farm, non-reserve dwellings with household income greater than $0 in 1990 (i.e. excludes negative or zero household income).

(26) Includes households in owner-occupied non-farm, non-reserve dwellings with household income greater than $0 in 1990 (i.e. excludes negative or zero household income).

(27) Worked 49-52 weeks in 1990, mostly full time.

(28) Worked 49-52 weeeks in 1990, mostly part time, or worked less than 49 weeks.

(29) Percentages may not add to 100% due to rounding.

(30) Includes loss.

(31) For persons with income.

(32) Families spending more than 70% of their income on basic necessities (food, shelter and clothing) are arbitrarily considered 'low income'. Low income cut-offs (LICOs) reflect size of family and size of area of residence.

(33) Calculations based on unrounded data.

CHAPTER 2 SURVEY OF HOUSEHOLD SPENDING & DWELLING CHARACTERISTICS AND HOUSEHOLD EQUIPMENT

Determining market share is an important element in a business plan. To estimate the potential in consumer markets, it's necessary to know about household expenditure behavior. How much people spend on goods and services and how that varies by area is key to a good business plan. Many factors will influence spending - income, family type (e.g. single persons, families with children, etc.), age of the family head, and whether it is an urban or rural environment.

SOURCES OF INFORMATION

The Survey of Household Spending has been conducted annually since 1997. This replaced the Family Expenditure Survey that had been conducted approximately every two years in recent times and was first done in 1953. Geographical coverage exists for selected metropolitan areas (Vancouver and Victoria) as well as the ten provinces. The Survey also includes questions about concerning dwelling characteristics and household ownership of various kinds of equipment and vehicles.

ADDITIONAL DATA AVAILABLE

Statistics Canada publishes the results of the expenditure survey in summary form along with the dwelling characteristics and household equipment data in CATALOGUE 62-202-XPB SPENDING PATTERNS IN CANADA. Household ownership data prior to 1997 was published annually in CATALOGUE 64-202 HOUSEHOLD FACILITIES AND EQUIPMENT. Apart from facilities listed in these tables, many other items have been questioned in the past (pianos, pets, boats, overnight camping equipment, heating and cooking appliances). There was a 1996 Family Food Expenditure Survey conducted by Statistics Canada that provided details, both quantity and values, of weekly food purchases. Summary results are on Statistics Canada's web site at http://www.statcan.ca/english/Pgdb/People/famili.htm#exp.

TECHNICAL NOTES

The survey covered the provinces and territories but excluded persons living on reserves, crown lands, official representatives of foreign governments, armed forces personnel living in military camps, members of religious and other colonies and persons in institutions. In the provinces, the coverage was 98% of the population and somewhat less in the territories. The survey was conducted in the first quarter of the year following the reference year. Expenditures were tabulated for full-year households only. With minor exceptions the survey included all spending for goods and services received in the reference year whether they were paid for or not in that year. Expenditures include GST, provincial retail taxes, tips and any other charges or taxes. Expenditures include gifts given to persons outside the household. Only gifts of clothing were reported separately, other than gifts of money. Other items purchased as gifts are in the appropriate product category.

Average Expenditure Per Household is equal to the total estimated expenditures of all households divided by the estimated number of households including those reporting zero. The Percentage Reporting is percentage of households that reported purchasing an item. Average Expenditure Per Household Reporting is the average expenditure of those households who make a purchase in that category. In using Household Expenditure data to estimate total sales in an area (e.g. average expenditure per household X estimated number of households), keep in mind that many people make purchases outside their local area and on vacations.

British Columbia Survey of Household Spending

2001

The data for this release came from the 2001 Survey of Household Spending. More information about the Survey of Household Spending and other expenditure surveys can be obtained free on the Statistics Canada Website (www.statcan.ca), under the headings Products and services, Research papers (free), Personal finance and household finance, Household expenditures research papers series. Previous to 1997, expenditure data came from the Family Expenditure Survey (FAMEX). Readers should be cautious when making comparisons with previously-released expenditure data.

2001 Survey of Household Spending

Detailed Average Household Expenditure, Percentage Reporting, Average Expenditure per Household Reporting, Percentage of Total Expenditure, British Columbia, 2001, All Households

5555	New installations of equipment & fixtures: contract, labour & material cost	87	5.5%	1,590	

(1) Based on full-year households only. See the section about the survey universe in the User Guide.

(1a) Caution should be exercised when making year-to-year comparisons since changes may not be statistically significant. In order to determine whether a change is statistically significant, please refer to the accompanying User Guide where information about sampling error as well as coefficients of variation & how to use them is available. Special caution is necessary when using estimates from small sub-groups (such as certain metropolitan areas) where the sample size is less than 200.

(2) Prior to 1997, mortgage interest & interest on loans were reported in the Shelter & Miscellaneous categories. For 1997, regular mortgage payments on owned living quarters, including both principal & interest, are included under shelter. Loan payments & mortgage payments (including both principal & interest) on owned vacation homes & other properties are reported under money flows. When comparing time series, this affects the following expenditure categories: Shelter, Principal accommodation, Owned living quarters, Miscellaneous, Total current consumption, & Total expenditure.

(3) Respondents sometimes report household electricity payments together with their water & sewage payments. This affects estimates of average household expenditure & percentage reporting for "Electricity" & "Water & sewage". The summary category "Water, fuel & electricity" is unaffected.

(4) Values are presented here as a negative expenditure.

(5) "Average expenditure per household reporting" was calculated using unrounded data. Note also that expenditures in this column do not add to sub-totals.

(1) Based on full-year households only. See the section about the survey universe in the User Guide.

(1a) Caution should be exercised when making year-to-year comparisons since changes may not be statistically significant. In order to determine whether a change is statistically significant, please refer to the accompanying User Guide where information about sampling error as well as coefficients of variation & how to use them is available. Special caution is necessary when using estimates from small sub-groups (such as certain metropolitan areas) where the sample size is less than 200.

(2) Prior to 1997, mortgage interest & interest on loans were reported in the Shelter & Miscellaneous categories. For 1997, regular mortgage payments on owned living quarters, including both principal & interest, are included under shelter. Loan payments & mortgage payments (including both principal & interest) on owned vacation homes & other properties are reported under money flows. When comparing time series, this affects the following expenditure categories: Shelter, Principal accommodation, Owned living quarters, Miscellaneous, Total current consumption, & Total expenditure.

(3) Respondents sometimes report household electricity payments together with their water & sewage payments. This affects estimates of average household expenditure & percentage reporting for "Electricity" & "Water & sewage". The summary category "Water, fuel & electricity" is unaffected.

(4) Values are presented here as a negative expenditure.

(5) "Average expenditure per household reporting" was calculated using unrounded data. Note also that expenditures in this column do not add to sub-totals.

(1) Based on full-year households only. See the section about the survey universe in the User Guide.

(1a) Caution should be exercised when making year-to-year comparisons since changes may not be statistically significant. In order to determine whether a change is statistically significant, please refer to the accompanying User Guide where information about sampling error as well as coefficients of variation & how to use them is available. Special caution is necessary when using estimates from small sub-groups (such as certain metropolitan areas) where the sample size is less than 200.

(2) Prior to 1997, mortgage interest & interest on loans were reported in the Shelter & Miscellaneous categories. For 1997, regular mortgage payments on owned living quarters, including both principal & interest, are included under shelter. Loan payments & mortgage payments (including both principal & interest) on owned vacation homes & other properties are reported under money flows. When comparing time series, this affects the following expenditure categories: Shelter, Principal accommodation, Owned living quarters, Miscellaneous, Total current consumption, & Total expenditure.

(3) Respondents sometimes report household electricity payments together with their water & sewage payments. This affects estimates of average household expenditure & percentage reporting for "Electricity" & "Water & sewage". The summary category "Water, fuel & electricity" is unaffected.

(4) Values are presented here as a negative expenditure.

(5) "Average expenditure per household reporting" was calculated using unrounded data. Note also that expenditures in this column do not add to sub-totals.

(1) Based on full-year and part-year households. See the section about the survey universe in the User Guide.

(1a) Caution should be exercised when making year-to-year comparisons since changes may not be statistically significant. In order to determine whether a change is statistically significant, please refer to the accompanying User Guide where information about sampling error as well as coefficients of variation and how to use them is available. Special caution is necessary when using estimates from small sub-groups (such as certain metropolitan areas) where the sample size is less than 200.

SECTION C PEOPLE & MARKETS

CHAPTER 3 MIGRATION COMPONENTS

Over half (56.2%) of the province's residents moved at least once during the period 1991 to 1996. In fact, British Columbia was the only province that had more people who changed residence over a five-year period, than remained in the same residence. We are a very mobile population and in many regions of the province growth is attributable to net migration. This movement creates a demand for goods and services - household moving services, housing (and often new furniture and appliances, floor coverings etc.), education, daycare, retail services to name a few. Migration estimates are for "long distance" movers, that is people who moved between census divisions in British Columbia (intraprovincial migrants), moved between a census division in British Columbia and a census division elsewhere in Canada (interprovincial migrants), arrived from another country (immigrants) and departed to another country (emigrants). Moves that were made within a census division, for example, from one end of town to another, are not counted.

The most mobile age group in BC was those between 25 and 34. Approximately eighty percent of this group moved at some time between 1991 and 1996.

SOURCE OF INFORMATION

The Demography Division of Statistics Canada has provided the information in this table to BC Stats. Migration estimates are based on information contained in the Revenue Canada income tax file.

DEFINITIONS OF TERMINOLOGY ON DATA TABLES

"International" is the count of migrants moving to or from outside Canada.

"Interprovincial" is the count of migrants moving to or from other provinces or territories in Canada.

"Intraprovincial" is the count of migrants moving to or from other census divisions in British Columbia.

"Net NPR" is the net change in non-permanent residents, which includes persons residing temporarily in Canada who hold a student, work, or minister's permit, or who are refugee claimants. No estimates of Net NPRs or Returning Canadians are available prior to 1986 on a sub-provincial basis.

"Ret.Cdns." are returning Canadians – Canadians who emigrated from Canada in the past, and who are returning with the intention of once again becoming permanent residents.

"In" is the count of migrants moving from other areas (the sum of in-migrants from elsewhere inside or outside Canada.

"Out" is the count of migrants moving to other areas (the sum of out-migrants to elsewhere inside or outside Canada).

"Net" is the difference between "In" and "Out" migration.

TECHNICAL NOTES

This table presents migration estimates by Census Division on an annual basis from 1976/77 to the most current year. The migration estimates are derived from a comparison of addresses from individual income tax returns for two consecutive years. Component estimates since 1986 are for the period July 1 to June 30 of the following year. Prior to 1986, the reference period is from June 1 to May 31 of the following year. Data for the period 1976/77 to 1980/81 is experimental.

OTHER RELATED DATA AVAILABLE

Additional information can be purchased from Population Estimates Section (613-951-2320, fax: 613-951-2307), Demography Division, Statistics Canada.

Footnotes

1. Net NPR is the net change in non-permanent residents, which include persons residing temporarily in Canada who hold a student, work, or minister's permit or who are refugee claimants.
2. Returning Emigrants are Canadians who emigrated from Canada in the past, and who are returning with the intention of once again becoming permanent residents.
3. Net T.A. is the net change in persons who are temporarily abroad, that is, residents who have temporarily moved to another country, but have the intention of returning to live in Canada.
4. No estimates of net Temporarily Abroad are available prior to 1996/97.

Note: Interprovincial and intraprovincial migration estimates are based on information contained in the Revenue Canada income tax file.

Prepared by: Population Section, BC STATS
Source: Statistics Canada

CHAPTER 4 VITAL STATISTICS

These important components of population change also have other useful marketing applications.

Live **BIRTHS** stimulate demand for all kinds of products and services. Flowers, cards, pictures, videos, the whole array of baby products, clothing, furniture, carriages, car safety seats, toys, diapers, diaper services, daycare, educational programs for new parents, activity programs for infants, informational literature. And of course leading up to the event, the demands of pregnancy, maternity clothes, educational materials, relaxation, and dietary requirements to be fulfilled.

DEATHS create a demand for certain goods and services such as: flowers, cards, and funeral services. Bereavement may require counselling services; individuals left on their own may need financial and other services.

SOURCES OF INFORMATION

These events are normally registered with the Provincial Vital Statistics agencies, which produce an annual report. Statistics Canada collects data from all the provinces and publishes this information on a local, provincial and national basis.

ADDITIONAL DATA AVAILABLE

Additional information on births includes age of mother at time of first birth, marital status of mother, sex of the child, multiple births, birth weight, births by birth order, and even the 50 most popular boys and girls names. The age of women having their first child is increasing and may influence the maternity/baby market. Multiple births create a demand for special furniture. And if you are making up custom "Name" products, you will want to know what's hot. The Vital Statistics web site (http://www.hlth.gov.bc.ca/vs) can be of some help with both the annual and quarterly reports made available.

Death information includes age and sex, as well as cause, both medical and external (such as drowning, motor vehicle etc.).

OTHER REFERENCES

See also "British Columbia Population Forecast" and "P.E.O.P.L.E" forecasts for Development Regions, Regional Districts and Local Health Areas for projections of births and deaths to the year 2021.

TECHNICAL NOTES

Data is available annually, usually two years after the fact. Births and deaths are counted in the place of usual residence (rather than place of occurrence, which would tend to concentrate numbers where major medical facilities are located).

Note: Total is the number of events in the specified category for the 1997 to 2001 period.
Infant Death - deaths of children under one year of age.
Low Birth Weight live births - live births with birth weight <2,500 grams.
Cesarean - live births delivered by cesarean section.
Pre-term - live births with gestational age <37 weeks.
Teenage Mother - live births to mothers under 20 years of age.
Elderly Gravida - live births to mothers 35 years of age or older.
Death is the total number of deaths from the specified cause for the 1997 to 2001 period.
D<75 is the number of deaths under 75 years of age from the specified cause.
SMR - Standardized Mortality Ratio.
PYLLI - Potential Years of Life Lost Index.
Rate - per 1,000 population in the specified area.
Rate1 - rate per 1,000 live births in the specified area.
Rate2 - per 1,000 total births in the specified area.
SMR, PYLLI, and Rate are based on the five year period from 1997 to 2001.
* Statistical testing indicates that observed deaths are statistically different from the expected deaths ($p<0.05$, two tailed).
+ denotes statistical significance based on less than five cases.
TR - Trend in ASMR based on three year moving average from 1986 to 2001 (See Glossary under Trend Analysis of ASMR for a full explanation).
★ indicates a statistically significantly positive (increasing) trend and
! indicates a statistically significantly negative (decreasing) trend (in areas with an average of less than 1 death per year in the 16 year period, 1986 to
TR* - Trend reflects change in ***Medical Certification of Death*** form introduced in 1993. Please see Highlights to Table 39 for details.
Five live births with gender unknown are excluded from birth data in Tables A, C and E.
Three deaths with gender unknown are excluded from mortality data in Tables B, D and F.
HSDA 32 Vancouver may include unspecified Vancouver addresses.
N.S. - Not Stated.
Non-residents are excluded.

SECTION C PEOPLE & MARKETS

CHAPTER 5 NEIGHBOURHOOD INCOME AND DEMOGRAPHICS

In marketing any product or service, having the most current possible population and income data is vital. The Census of Population is taken every five years and offers an extensive and flexible database of information about the population. However, some areas are undergoing rapid change and it is helpful to have even the limited data provided by taxfiler analysis to update knowledge of an area.

Taxfiler data is a summary of information from personal income tax returns geographically organized by Postal area. This data series includes numbers of taxfilers by age, sex, marital status, and income. Taxfiler summary data combined with Householder Counts available from the Admail services of Canada Post, can also assist in targeting a direct mail campaign.

SOURCES OF INFORMATION

Taxfiler summary data is made available annually by Canada Customs and Revenue Agency (formerly Revenue Canada) and is a summary of personal income tax returns filed. Data has been made available beginning with the 1985 tax year.

TECHNICAL NOTES

Postal areas are defined by 3-character FSA's (Forward Sortation Areas) in urban areas (e.g. V2S) or Postal Codes in rural areas (e.g. V0N).

Name of an area is a Post Office designator for an area and usually does not correspond to municipal boundaries.

Income Distribution levels is cumulative; taxfilers at each level were included in all levels below.

Indexes set the median income level for Canada or for British Columbia at 100 so that the index for a particular area reflects the median income relative to Canada or B.C.

Taxfilers with employment income and/or Employment Insurance are a proxy measure for persons in the labour force. Note that a tax return gives no information as to whether the filer is a full-time or full-year worker.

SOME CONSIDERATIONS

In some circumstances there is no requirement to file an Income Tax return - when there is no taxable income. These tables, therefore, do not include all income recipients. In addition, some taxfilers will file particularly for a tax rebate such as the Child Tax Credit. For many research purposes household income (available subprovincially from the Census only) is a more meaningful measure than individual income. When looking at female incomes, keep in mind that most people are part of a family unit often with more than one income recipient. In very high-income areas, individual female incomes tend to be low.

OTHER RELATED DATA

Statistics Canada offers additional data drawn from the Income Tax Return database. On a cost-recovery basis, one can obtain cross-tabulated data such as income by age of the taxfiler, or income by source (e.g. employment, investment, pension etc.) by age of the taxfiler. Other related databases available through Statistics Canada look at investment and RSP activity of taxfilers. For more information contact Statistics Canada, Advisory Services, in Vancouver at 666-3691/1-800-263-1136.

1999 Neighbourhood Income and Demographics for British Columbia

Neighbourhood Income and Demographics is based on data derived from tax returns for 1999. Beginning in 1990, the variable 'Total Income' was revised to include Federal Sales Tax Credit/GST Credit. In 1994, 'Total Income' was further changed to include income for non-filing spouses reported on the taxfiler's income tax return. These changes affect comparisons to previous years' data. The data in this profile are derived from income tax returns, which were, for the most part, filed in the spring of 2000. The mailing address at the time of filing is the basis for the geographic information in the table. The data in the following tables is organized by Forward Sortation Area (FSA). Rural postal codes are identified with a "zero" as the middle digit (e.g. V0N), urban postal codes are identified as a three-digit character code with a "one to nine" as the middle digit (e.g. V8T).

Development Regions and the Regional Districts they include:

1	**Vancouver Island/Coast***
23	Alberni-Clayoquot
17	**Capital***
45	Central Coast
25	Comox-Strathcona
19	Cowichan Valley
43	Mount Waddington
21	Nanaimo
27	Powell River
2	**Mainland/Southwest ***
09	Fraser Valley
15	**Greater Vancouver***
31	Squamish-Lillooet
29	Sunshine Coast
3	**Thompson/Okanagan***
35	Central Okanagan
09	Columbia-Shuswap
37	North Okanagan
07	Okanagan-Similkameen
33	Thompson-Nicola
4	**Kootenay***
03	Central Kootenay
01	East Kootenay
05	Kootenay-Boundary
5	**Cariboo***
41	Cariboo
53	Fraser-Fort George
6	**North Coast***
49	Kitimat-Stikine
47	Skeena-Queen Charlotte
7	**Nechako***
51	Bulkley-Nechako
57	Stikine (Unorganized)
8	**Northeast***
55	Peace River
59	Northern Rockies (formerly Fort Nelson-Liard)

*** Available regions**

Forward sortation areas that cross development region boundaries are included in each appropriate region.

Confidentiality, Rounding and Suppression

To maintain confidentiality of individuals (taxfilers), data have been suppressed whenever:

- areas comprise less than 100 taxfilers (data included in "OTHER" category under Postal Area Name)
- cells represent less than 15 taxfilers (data for cell and one other cell replaced with '0')
- income totals were dominated by a single filer.

1999 Neighbourhood Income and Demographics for British Columbia

Total Income - Income reported by taxfilers for 1999 from any of the following sources:

- Labour force income
  - Employment income
    - Wages and salaries
    - Income from self-employment
  - Employment Insurance benefits
- Pension income
- Old Age Security
- CPP/QPP, superannuation
- Child Tax benefits
- Interest & other investment income
- Limited partnership income
- Rental income
- Other income (eg. alimony, income for non-filing spouses)
- RRSP income
- Non-taxable income
  - GST credit
  - Child tax credit
  - Workers' compensation payments
  - Social assistance payments
  - Guaranteed income supplements

Monies not included in income above are: veterans' disability and dependent pensioners' payments, war veterans' allowances, lottery winnings and capital gains.

Total Number of Taxfilers
Represents counts of taxfilers in designated groups and are rounded to a base of 10.

Median Income $
The middle of a group of numbers. When a median income is given as $26,000, it means that exactly half the incomes reported are equal or above, and that the other half are equal or below the median amount. Medians are rounded to the nearest $100. Aggregate (Total) amounts are rounded to the nearest $1,000.

Canadian Index, BC Index
The 1999 median total income for both sexes is compared to the Canadian median (or BC median) and expressed as an index. An index of 120 indicates that the median total income for an area is 20% higher than the comparison (Canadian or BC) median. Similarly, an index of 80 indicates that the median total income for an area is 20% below the comparison median.

Income Distribution
The levels of income are cumulative; taxfilers at each level were included in all levels below.

SECTION D

POPULATION PROJECTIONS AND ESTIMATES

1. POPULATION PROJECTIONS

Every year *BC Stats* projects the Provincial population based on the most currently available information. The annual **BRITISH COLUMBIA POPULATION FORECAST** contains timely articles, the details of the projection, and methodological notes. Estimates are also made for small areas within the Province. *BC Stats* now includes estimates of Census **undercount** in all historical and projected populations.

BY REGIONAL DISTRICT

Complete detail of the projection.

HOUSEHOLD PROJECTIONS

Here the household is the unit projected through time.

2. POPULATION ESTIMATES

Current population estimates for all regional districts and incorporated municipalities, based on the recent Census. Depending on the Census cycle, this chapter will include **intercensal** estimates or **post censal** estimates.

SECTION D POPULATION PROJECTIONS AND ESTIMATES

CHAPTER 1 POPULATION PROJECTIONS

Knowing the future of your market is vital information for business planning. If population or household formation drives your market, reliable forecasts are critical. The changing age structure of the population will affect demand for many goods and services. The population over 65 is presently 13% of B.C.'s total population; by the year 2026 it is likely to account for 20%. The number of children and teens will decline as a share of the population. Without the movement of people from other areas to B.C., our population would eventually decline. Areas in northern B.C. tend to have younger populations than communities in the south. The majority of the population is currently, and likely to continue to be, in the southern parts of the province.

The number of persons per household has been declining over the past decade and is expected to continue to decline. Households will grow therefore at a faster rate than population. Household formation will affect the demand for housing and the type of housing as well as all those other goods and services attendant with housing (e.g. furnishing, textiles, maintenance and repair services, financing, etc).

This chapter includes detailed age by sex forecasts of population, as well as the components of population change, and forecasts of households for the Regional District.

SOURCE OF INFORMATION

Population forecasts are produced by the Population Statistics Section, *BC STATS*, Victoria

ADDITIONAL DATA AVAILABLE

In addition to population and household forecasts for the Regional Districts, they are also available for the 8 Development Regions, the 83 Local Health Areas, Vancouver and Victoria Metropolitan Areas, and Vancouver Island. These are published under the title "P.E.O.P.L.E." (Population Extrapolation for Organizational Planning with Less Error). For more information, contact *BC Stats* at (250) 387-0327 and via Fax at (250) 387-0329.

OTHER RELATED SOURCES

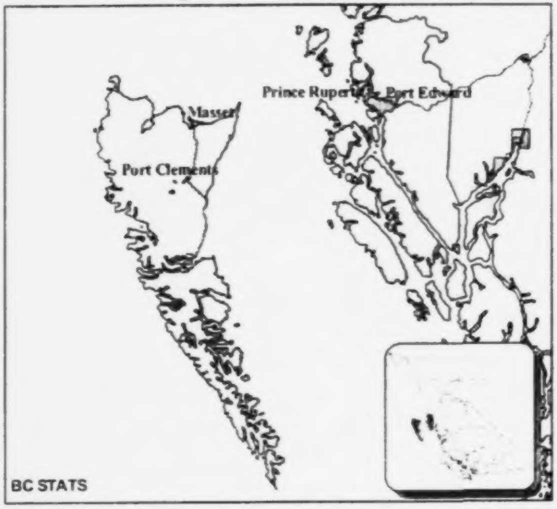
The B.C. Ministry of Education forecasts public school enrollments by grade by School District. New forecasts are produced each year. Forecasts of provincial population by age and sex and of households are published by Statistics Canada for all the provinces; these are revised approximately every five years after the results of the Census are tabulated.

TECHNICAL NOTES

Population forecasts are produced by *BC Stats* each year as new data on historical trends becomes available to make adjustments. Users should ensure that the latest forecast is being used.

Skeena-Queen Charlotte

Regional District 47



P. E. O. P. L. E.

Population Extrapolation for Organizational Planning with Less Error

British Columbia small area population projections result from the application of a "Component/Cohort-Survival" population model to area-specific assumptions dealing with fertility, mortality and migration. The Component/Cohort-Survival method requires separate forecasts of each of the components of population change, namely fertility, mortality and migration. With this information, and with a base year age-specific estimate of population, a projection for any subsequent year is made by promoting each age group in the preceding year to the next highest age group, while at the same time taking into account the effects of net migration, deaths and births. To view the most recent *BC Stats* forecasts please see our WEB page 'www.bcstats.gov.bc.ca/data/pop/pop/popproj.htm'.

For further information contact:

Population Section,
BC Stats,
Ministry of Management Services,
Government of British Columbia,
553 Superior Street,
Victoria, British Columbia,
V8V 1X4,
(250) 387-0327

In general, all assumptions relating to migration, births and deaths by small area are based on past conditions, modified wherever possible to take into consideration possible future changes. Consequently, the resulting population projections are not necessarily what will be, but rather what could be, given the realization of these conditions. It is certainly possible that unforeseen changes in factors such as economic development, government policy, land use and zoning will affect future populations. Consequently, the projections should only be regarded as one possible scenario of the future size and age-sex structure of the population.

Terms and Conditions of Utilization of PEOPLE Projection Statistics

BC STATS

REGIONAL DISTRICT 47000: SKEENA-QUEEN CHARLOTTE

Municipalities in Regional District:
Masset, Port Clements, Port Edward, Prince Rupert

GENERAL ECONOMY

Fishing and forestry are the primary economic activities in this region. The Prince Rupert area has the largest concentration of fish processing facilities in the province outside the Vancouver region.

Developments affecting this region include cutbacks in the forest sector and possible further restrictions imposed on the fishing industry to avoid depletion of salmon stocks. The Prince Rupert area has seen some movement from the area in recent years and this out-migration is likely to continue if there is no improvement in the resource sectors. Skeena Cellulose has been sold but the new owners are still in negotiations with the workers. Off-shore oil drilling may start in several years and would have a significant impact on population.

DEMOGRAPHICS

This region has generally experienced net migration outflows over the last 25 years. The natural increase (i.e., the excess of births over deaths) has offset migration outflows, but in some years there has been a population decline.

The gender ratio for this area is substantially weighted in favour of males, in contrast to the province as a whole, which has more females than males. This is likely due to the dependence on male-dominated resource industries. Since men tend to have lower life expectancies than women, the median age at death is lower than the provincial median. The overall median age is also lower than for the province as a whole and this is reflected in the ratio of children (aged 17 and under) to working age population (aged 18 to 64), which is much higher than the provincial ratio, and the ratio of elderly (aged 65 and over) to working age population, which is much lower than the provincial ratio. Also, the total fertility rate in this region is substantially higher than the provincial rate.

PROJECTIONS

This region has generally experienced net outflows of migrants and it is expected that this trend will continue although not to the same extent. Deaths will likely begin to exceed births towards the end of the projection period, and in combination with the out-migration, should result in a negative population growth rate.

Prepared by: Population Section, BC STATS,
Ministry of Management Services,
Government of the Province of British Columbia,
Using P.E.O.P.L.E. Projection Model, Projection 27.

Date run: July 22, 2002.
Prepared for: Ministry of Management Services.
Enquiries: Population Section, BC STATS
Ministry of Management Services, (250) 387-0327.

Note: All figures as of July 1.
Child Dep. = Pop(0-17) / Pop(18-64)
Elderly Dep. = Pop(65+) / Pop(18-64)
Households = Census Definition Households
Crude Dth Rate = Calendar year death estimates per 1000 population
TFR = Lifetime births per 1000 women (15-49), calculated on calendar year estimates
Sex Ratio = Males per 100 females

Figures for the period 2002-2031 are projected.
Due to rounding, the sum of the components of change may not equal the total population change.

British Columbia Household Estimates and Projections

for Census Divisions (Regional Districts)

1986-2031

Notes:

A private household, as defined by Statistics Canada, is a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

British Columbia small area household projections were produced with the use of a demographically driven model. The primary function of this model is to project the average number of persons per household in each small area.

The model was developed through multiple linear regression analysis relating the cross-sectional variations in the average number of persons per household to that of three demographic factors, namely the child population (age 0 to 19), the married population, and the divorced plus separated population.

Projections of the average number of persons per household by small area were derived from projections of each of the three causal factors mentioned earlier. Population projections (total and child) were obtained from a Component Cohort-Survival population projection model (PEOPLE 27) developed by BC Stats.

Small area household projections resulted from applying the projected average number of persons per household to the projected population.

Household projections for British Columbia were obtained by aggregating the small area projections. The total number of households in British Columbia was 1,157,724 in 1986, and is projected to increase steadily to reach 2,700669 in year 2031.

SECTION D POPULATION PROJECTIONS AND ESTIMATES

CHAPTER 2 POPULATION ESTIMATES

Regional District and municipal population estimates are calculated by the Population Section of *BC Stats* through a regional population estimation model that has been developed and refined since the late 1970's. Using indicators such as residential electrical connections and Old Age Security data, *BC Stats* is able to produce relatively accurate population estimates without the high cost to taxpayers of conducting a census.

Knowledge of population growth and where it occurs are vital to the planning process. For this reason, the Municipal and Regional District population estimates are an important tool for both the public and private sectors in assessing current and future needs for goods and services.

This chapter contains the recent post-censal population estimates along with a map comparing regional growth rates and descriptive highlights.

SOURCE OF INFORMATION

Population estimates are produced by the Population Statistics Section, *BC Stats*, Victoria

ADDITIONAL DATA AVAILABLE

Estimates are also produced on an annual basis for other administrative areas including School Districts, Local Health Areas, and Development Regions. These are available from *BC Stats* at (250) 387-0327 and via Fax at (250) 387-0329.

OTHER RELATED SOURCES

Statistics Canada also produces population estimates for Census Divisions (Regional Districts) and Census Metropolitan Areas (CMA's).

TECHNICAL NOTES

The population estimates contained in this chapter are based on the most current Census. Revisions based on postcensal undercount figures are made available after each Census. The intercensal estimates (between census years) are revised to account for any discrepancies between Census figures, plus net census undercounts released by Statistics Canada and estimates produced by BC Stats.

The reference period for the population estimates has been moved from June 1 to July 1.

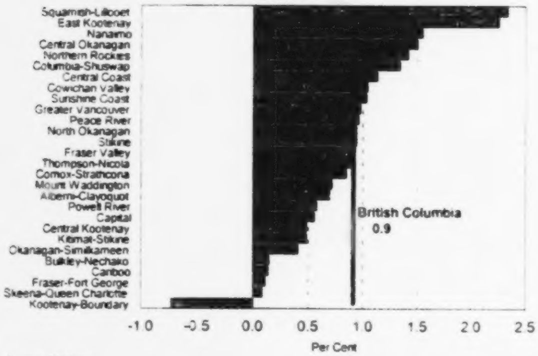
Municipal Population Estimates ◆ 2001

The Province

British Columbia had the third highest population growth rate in Canada between 2000 and 2001. The province grew at a rate of 0.9 per cent, or 37,101 persons, between July 1, 2000 and July 1, 2001. Alberta (1.8 per cent) and Ontario (1.6 per cent) had higher growth rates among the provinces and Nunavut (2.7 per cent) also experienced strong growth.

International migration was the biggest contributor to B.C.'s population growth during the year, followed by natural increase (births less deaths). Offsetting this growth was a net loss in population during the year from interprovincial migration to Alberta (-10,780) and to Ontario (-3,695).

Population Growth by Regional District
2000-2001



Source: BC Stats

Regional Districts

On a regional basis, the strongest population growth in the last year appeared in pockets and was not concentrated in any one part of the province. Population increases were highest (2.3 per cent) in Squamish-Lillooet and East Kootenay regions, followed by Nanaimo and Central Okanagan regions, both with increases of 1.5 per cent.

Greater Vancouver, home to half the province's population, recorded a slightly higher than average population growth rate of 1.0 per cent, while the increase in Fraser Valley (0.9 per cent) was the same as the provincial average. Population growth in the Capital region, which contains the Victoria CMA, was somewhat weaker at 0.6 per cent, but stronger than in the previous three years.

Regional District	*2001 Population*	*% Increase*
Squamish-Lillooet	37,131	2.3
East Kootenay	63,644	2.3
Nanaimo	136,920	1.5
Central Okanagan	154,910	1.5
Northern Rockies	6,520	1.4
Columbia-Shuswap	53,644	1.3
Central Coast	4,377	1.1

Kootenay-Boundary (-0.7 per cent) was the only regional district to register a decline in population over the last year, with widespread decreases throughout the region. This was the fourth consecutive year of declining population for the region.

Municipalities

Maple Ridge had the highest population increase for municipalities over 50,000 population (1.8 per cent). This continues the strong trend of the last few years, in which Maple Ridge has had annual growth in the 1.5-2.5 per cent range.

Municipal 5,000+	*2001 Population*	*% Increase*
Fernie	5,511	4.6
Whistler	9,965	3.0
Lake Country	9,587	2.4
View Royal	7,764	2.4
Kent	5,622	2.2
Nelson	9,853	1.9
Maple Riidge	64,238	1.8
Fort St. John	17,129	1.8

The three largest municipalities in B.C. had more moderate population growth of around 1.0 per cent (Vancouver at 1.1 per cent, Surrey at 1.4 per cent, and Burnaby at 0.8 per cent).

For municipalities greater than 5,000 population, Fernie (4.6 per cent) and Whistler (3.0 per cent) showed the largest increases. Population growth in Whistler has eased to the 2.5-3.0 per cent range in the last three years due in part to infrastructure constraints. Population growth in the nearby municipalities of Pemberton (7.1 per cent) and Squamish (1.6 per cent) picked up in 2001, after coming to a standstill in the previous year. Some other tourism-oriented areas posted strong growth in 2001: Radium Hot Springs at 8.3 per cent and Tofino at 5.8 per cent.

Municipal 5,000+	*2001 Population*	*% Decrease*
Trail	7,515	-2.7
Mackenzie	6,177	-1.5
Creston	5,082	-1.5
New Westminster	54,207	-1.2
White Rock	17,169	-1.1
Oak Bay	17,494	-0.9
Prince Rupert	16,924	-0.5

Municipalities such as Trail, White Rock and Oak Bay have generally been losing population over the last few years, while the changes in some of the other municipalities listed above are more variable from one year to the next.

Regional centres such as Kelowna, Vernon, Kamloops, Smithers, and Courtenay are also gaining population in part due to the movement of population from smaller municipalities. This migration occurs partly due to decreasing employment opportunities in the smaller resource-dependent communities. Larger centres offer expanded employment opportunities that can act as a magnet for population.

In the north-east part of the province, Fort St. John and Fort Nelson both grew by 1.8 per cent as the oil and gas sector provided increased employment opportunities.

Other highlights from the 2001 municipal and regional district estimates include:

- There are 154 incorporated municipalities within British Columbia following the incorporation in 1999 of Sooke and Bowen Island. Just over 70 per cent of all municipalities experienced a population increase over the last year.
- Over the last year, the overall population of the rural unorganized area grew at the same rate as the total of the incorporated areas.
- Within the Capital region, steady population growth has continued in the western communities (View Royal, Highlands, Langford, and Metchosin). However, larger "core" municipalities such as Saanich, Victoria and Esquimalt grew at a slower pace than the western part of the region.
- Vancouver Island's central and southern regions continue to exhibit weak but steady growth (less than 1.0 per cent) with only the Nanaimo region (1.5 per cent) and Cowichan Valley (1.0 per cent) showing above average growth.
- The East Kootenay region, especially the part closest to the Alberta border, experienced strong growth and may be benefiting from the strength of the neighbouring province.

Municipal estimates are calculated by the Population Section of BC Stats through a regional estimation model that has been developed and refined over the past 20 years. This model, which uses indicators such as residential electrical connections and Old Age Security data, has enabled BC Stats to produce relatively accurate population estimates without the high cost of conducting a census.

Knowledge of population growth and where it occurs are vital to the planning process. For this reason the Municipal and Regional District Estimates are an important tool for the provincial and local governments in assessing current and future community needs.

The population estimates for 1996 to 2001 (as well as the estimates for 1976-1995) are available on the BC Stats web site: **http://www.bcstats.gov.bc.ca**

Notes:
All figures correspond to municipal boundaries as of July 1st of the year stated.
All figures are as of July 1st of the year stated.

C = City, T = Town, VL = Village, DM = District Municipality,
IM = Island Municipality, IGD = Indian Government District.

* *Denotes a boundary change between 1996 and 2001.*

** *Sechelt Indian Government District is split between Sunshine Coast and Powell River Regional Districts.*

SECTION E

ECONOMIC AND SOCIAL INDICATORS

1. **COMMUNITY FACTS**

   A two-page compendium of statistics for the Regional District and for each incorporated community within the District.

2. **EMPLOYMENT INSURANCE STATISTICS**

   Unemployment Insurance claimants as a percent of the working age population. This presentation allows a detailed look at the Regional District and a comparison to all other District totals.

3. **BUILDING PERMITS BY TYPE**

   Annual values of Commercial. Industrial. Institutional / Government and Residential building permits and number of Residential Dwelling Unit Permits for areas within the Regional District. Comparative totals for all other Regional Districts are presented.

4. **INCOME PROFILE & TAXATION STATISTICS**

   Source of Income. Taxation. Transfer payments. Economic and Relative Income Ratios. Average & Median Income. Detailed BC taxation statistics by Age Group & Sex.

5. **SOCIO-ECONOMIC STATISTICAL PROFILE**

   Tables and charts showing socio-economic information such as age. ethnic origin. migration. social assistance recipients. crime. education. child care. health. income and labour market activity.

SECTION E ECONOMIC AND SOCIAL INDICATORS

CHAPTER 1 REGIONAL & COMMUNITY FACTS

Local indicators of economic activity tell us about the vitality of a community, as well as the specifics of certain activity. The **Community Facts** offer a comparison to provincial figures of various socio-economic indicators. Some of these indicators include population, residential assessments, new business incorporations, bankruptcies, income assistance and employment insurance beneficiaries, construction activity, and income. This two page snapshot in time displays a variety of data specific to each municipality and regional district.

SOURCES OF INFORMATION

Population estimates are produced by *BC Stats*. Employment Insurance Statistics are calculated from E.I. beneficiaries as a percent of the adult population. The Ministry of Finance and Corporate Relations provides business Incorporations. The Ministry for Children and Families provides income assistance data (B.C. Benefits) came from administrative data files. Building Permits data includes municipalities, which report to Statistics Canada. Residential Assessment Authority data are provided by British Columbia Assessment Authority. The Bankruptcy Division of Consumer & Corporate Affairs Canada supplies bankruptcies. Personal Taxation Statistics are based on Revenue Canada Taxation files. Finally, Statistics Canada contributed the selected Census characteristics.

ADDITIONAL DATA AVAILABLE

In most cases, longer historical series of data are available on request. Building Permits data are available by type of structure (see Chapter 3 of this section: BUILDING PERMITS BY TYPE). See Notes to Data Tables located at the end of **Community Facts**.

TECHNICAL NOTES

Regional & Community Facts reflect the total for the Regional District land area with the exception of Building Permits data. Building Permits are the sum of reporting municipalities (see page 1 of **Community Facts**). Most Community Facts reflect the data series for the incorporated municipality and will not include built-up areas outside municipal limits. Check footnotes.

Skeena-Queen Charlotte

Regional District

1 General

Incorporated in 1967, the main economic drivers of the Skeena-Queen Charlotte R.D. are fishing and forestry. Municipalities in the Regional District are Masset and Port Clements on Graham Island, and Port Edward and Prince Rupert on the mainland.

The three industries employing the most people in this area in 1996 were Manufacturing, Government Services and Retail Trade.

SECTION E ECONOMIC AND SOCIAL INDICATORS

CHAPTER 2 EMPLOYMENT INSURANCE BENEFIT STATISTICS

The health of the local economy is an important factor in business planning. In times of economic downturn a businessperson may have to develop different strategies to maintain a level of business. During times of high unemployment discretionary income is often saved as people face potential job uncertainty. People may put off purchases or look for cheaper alternatives. Durable goods sales typically fall during recessionary times. A drop in unemployment may signal improved prosperity.

Few indicators are available to us on a current basis to track trends. Employment Insurance beneficiaries' records allow a measurement of unemployment on a very local basis. A summary of the final legislative changes issued in July 1996 were: entrance requirement and benefit entitlement based on hours of work; average earnings over last 20 weeks used to calculate amount of benefits; replacement rate for repeat claimants lowered by one percentage point for each 20 weeks of use in the past 5 years (maximum of 5 percentage points); repeat claimants face a benefit claw-back of up to 100% depending on earnings and weeks of benefit in the last 5 years; weekly maximum insurable earnings revised to $750.

SOURCE OF INFORMATION

Human Resources Development Canada supplies employment Insurance beneficiaries' data. Estimates of the population aged 19-64 are calculated by *BC Stats*.

ADDITIONAL DATA AVAILABLE

Data assembled by *BC Stats* include quarterly figures on the number of unemployed beneficiaries, percent by selected age groups, average number of insured weeks, average number of weeks on claim, and average benefit rate by municipality, Regional District, and Development Region. Numbers of E.I. beneficiaries by sex for Regional Districts are available quarterly.

OTHER RELATED DATA

STATISTICS CANADA'S monthly Labour Force Survey collects information from a sample of 5,500 households in British Columbia. The unemployed as measured by this survey are essentially persons available for work and actively seeking work, regardless of their eligibility for Employment Insurance. This is the survey on which the "official" unemployment rates are based. The survey produces provincial estimates of employment and unemployment cross-tabulated by age, sex, education level, marital status, presence of children, industry, and occupation. Summary data is available for Development Regions and metropolitan areas.

[1] These figures include only a subset of total BC Benefits. **INCLUDED** are Youth Works, Welfare to Work, and Age 60-64. **EXCLUDED** are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined in these reports as "**each person living in a family or living alone that is receiving basic BC Benefits'**. Data does not include aboriginal people living on reserve. This definition is identical to the one used in the *BC STATS* reports on IA Recipients prior to 1996.

- Data too small to release.

[2] Beginning in June 1997, the combined BC Benefit+EI rate in this report has been adjusted to count only once those persons receiving both Employment Insurance and BC Benefits. Therefore use caution when comparing current data to pre June 1997 data. This adjustment resulted in an overall decrease of 0.3 percentage points to the BC rate in June 1997.

---

[1] These figures include only a subset of total BC Benefits. **INCLUDED** are Youth Works, Welfare to Work, and Age 60- **EXCLUDED** are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined in thes as **"each person living in a family or living alone that is receiving basic BC Benefits'**. Data does not include aborig people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1

- Data too small to release.

[2] Beginning in June 1997, the combined BC Benefit+EI rate in this report has been adjusted to count only once those persons receiving both Employment Insurance and BC Benefits. Therefore use caution when comparing current data to pre June 1997 data. This adjustment resulted in an overall decrease of 0.3 percentage points to the BC rate in June 1997.

[1] These figures include only a subset of total BC Benefits. **INCLUDED** are Youth Works, Welfare to Work, and Age 60-64. **EXCLUDED** are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined in these reports as **"each person living in a family or living alone that is receiving basic BC Benefits'.** Data does not include aboriginal people living on reserve. This definition is identical to the one used in the *BC STATS* reports on IA Recipients prior to 1996.

- Data too small to release.

[2] Beginning in Sept 1997, the combined BC Benefit+EI rate in this report has been adjusted to count only once those persons receiving both Employment Insurance and BC Benefits. Therefore use caution when comparing current data to pre Sept 1997 data. This adjustment resulted in an overall decrease of 0.3 percentage points to the BC rate in Sept 1997.

CHAPTER 3 BUILDING PERMITS BY TYPE

A boom in construction activity not only signals a demand for all kinds of construction services, but also for a range of goods and services that the householders and businesses, which move into new structures, will require.

DEFINITION OF TERMS

"Residential" permits give number of units of new housing to be constructed and estimated construction value for new dwellings, alterations, and improvements to existing dwellings.

"Industrial" permits is the estimated value of construction and improvements for buildings for uses such as manufacturing and processing, transportation, communication and other utilities and agriculture, forestry and mines.

"Commercial" permits is estimated value of construction on buildings such as stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons, and miscellaneous commercial installations.

"Institutional and Government" permits are estimated expenditures made by the community, public, and government for buildings and structures.

ABBREVIATIONS

C - City, **DM** - District Municipality, **RD** - Regional District, **T** - Town, **VL** - Village.

TECHNICAL NOTES

Usually municipalities are responsible for issuing building permits for structures within their municipal boundaries; Regional District offices issue permits for the unincorporated areas. However, building inspectors covers not all areas and some building may go unrecorded. Also, some issuing agencies do not supply their building permit data. TOTAL VALUE OF PERMITS SHOWN IN THIS REPORT IS LESS THAN THE ACTUAL VALUE BECAUSE OF INCOMPLETE REPORTING BY MUNICIPALITIES. In addition, some large projects do not require a permit. A dash in the report indicates either a nil report or a value less than $500.

ADDITIONAL DATA AVAILABLE

Statistics Canada produces electronic reports—a monthly one (Catalogue 64-001), and an annual one (Catalogue 64-203) titled BUILDING PERMITS which includes counts of residential units by type of structure (e.g. single dwellings, cottages, double dwellings, row houses, etc.). The annual edition also has permits data for swimming pools, garages and improvements and detailed breakdowns on type of structure for non-residential buildings. These publications can be purchased from the website—www.statcan.ca.

OTHER RELATED DATA

The Canada Mortgage and Housing monthly survey of urban centres with 10,000+ population measures housing starts, completions, under construction, absorption, and unoccupied dwellings. This offers a detailed look at additions to the new housing stock and the level of unsold inventory. Twice yearly CMHC also surveys for Apartment Vacancies and Rents in those same urban areas. The website address for CMHC is http://www.cmhc-schl.gc.ca.

British Columbia Building Permits

for Development Regions, Regional Districts, and Communities, by Type 1995 – 2001

Notes:

Data collected by Statistics Canada from reporting municipal and regional governments.

BC STATS, Box 9410 Stn Prov Govt, Victoria, B.C. V8W 9V1 (Location: 553 Superior Street) Web: www.bcstats.gov.bc.ca

BRITISH COLUMBIA BUILDING PERMITS BY TYPE

RESIDENTIAL Permits issued for new dwellings and alterations and improvements to existing dwellings.

NON-RESIDENTIAL Divided into three groups as follows:

Industrial: Includes buildings used for manufacturing and processing; transportation, communication and other utilities; and agriculture, forestry, mine and mine mill buildings.

Commercial: Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial installations.

Institutional and Government: Includes expenditures made by the community, public and government for buildings and structures.

NOTES:

- IN SOME CASES, THE TOTAL VALUE OF PERMITS SHOWN IN THIS REPORT IS LESS THAN ACTUAL BECAUSE OF INCOMPLETE REPORTING BY MUNICIPALITIES.
- Although the results of the Building Permit Survey are often used as a leading indicator of building activity, they do not represent the total construction activity in the province because not all areas report and some large projects do not require a permit.
- Figures shown under the Regional District name as RD apply to unincorporated areas.
- A dash indicates either a nil report or a value of less than $500.
- Maple Ridge, Pitt Meadows and a small unorganized area were added to Greater Vancouver in 1995. The balance of Central Fraser Valley and Dewdney-Alouette regional districts, with the whole of Fraser Cheam Regional District became the Fraser Valley Regional District at that time. The District Municipality of Matsqui and the District Municipality of Abbotsford joined to become the City of Abbotsford. In 1999, Fort Nelson-Liard Regional District name changed to Northern Rockies Regional District
- The University Endowment Lands are included in Greater Vancouver (RD) starting in the year 2000.

ABBREVIATIONS: C - City RD - Regional District VL - Village DM - District Municipality T - Town

CHAPTER 4

Income Profile & Taxation Statistics

Income, purchasing power, taxation levels, concepts of great importance to development professionals and marketers. Everyone consumes goods and services, and successfully targeting a product requires understanding the nature of the market. Revenue Canada income tax returns are a valuable resource for examining the makeup of available income in an area, and for comparing one area with another. Income profiles present income levels and trends for regional districts and communities. Included are income by source, percent of income surrendered to tax, average & median income, and trends in income sources. Income profiles also present economic dependency ratios, relative income ratios, and transfer payments by type. Detailed BC Taxation Statistics present selected sources of income, and declared tax deductions by age groups and sex in BC. Included are RRSP contributions, charitable donations, child care expenses, farming and fishing income, and other categories of interest.

SOURCE OF INFORMATION

The data is assembled from Revenue Canada Personal Income Tax Returns by *BC Stats*.

DEFINITIONS

Employment Income includes wages and salaries, commissions from employment, and other employment earnings.

Pension Income includes Old Age Security Pension, CPP or QPP Benefits, and other pensions or superannuation.

Investment Income includes taxable amount of dividends, bond interest, bank interest, mortgage interest, income from trusts annuity income, other Canadian investment income and foreign investment income.

Self-Employment Income includes net business income, net professional income, net commission income, net farming income and fishing income.

Other Income includes Family Allowance, Employment Insurance Benefits, net rental income, and miscellaneous income.

ADDITIONAL DATA AVAILABLE

Source of income data is available in table form for individual incorporated municipalities and unincorporated areas. Data is updated annually, two years after the reference year (i.e. tax returns filed in the spring of 1996 for the 1996 tax year become available in December 1998).

CAUTION

Tax returns are identified with a particular community on the basis of postal location and not on municipal boundaries.

OTHER RELATED DATA

Canada Customs and Revenue Agency (formerly Revenue Canada) publishes *Tax Statistics on Individuals* annually. This publication provides detailed profiles of Canadian taxfilers. The publication is available from their website—http://www.ccra-adrc.gc.ca/tax/individuals/stats/index-e.html.

SECTION E Economic and Social Indicators

CHAPTER 5 Socio-Economic Profile

Socio-economic profiles are designed to provide a portrait of the economic and social well being of regions within the province by bringing together statistical indicators from a variety of different sources. A unique feature of this package is charts, which show the topic region in comparison with the highest and lowest regions, as well as in relation to the provincial average.

SOURCES OF INFORMATION

Demographic information used in the tables is based on population estimates and projections produced by the Population Section of *BC Stats*. Data from the Census of Population and Housing is used in the tables on Family Structure, Ethnic Identity, Income Levels, Housing Costs, Labour Demand, Supply and Other, and General Education. Employment Insurance claimants shown in the Unemployment table are obtained from administrative files supplied by Employment and Immigration Canada. The Income Assistance tables are based on administrative files from the Ministry of Human Resources. Crime statistics are obtained from the Police Services Division of the Ministry of Public Safety and Solicitor General. Data on high school graduates, provincial exams, and test scores in the Education table comes from the Ministry of Education. Health indicators used in the Health tables were from the Ministry of Health Services and the Vital Statistics Agency. Finally alcohol consumption is based on data from the BC Liquor Distribution Branch.

ADDITIONAL DATA AVAILABLE

The Labour and Social Statistics Section of BC Stats prepare these profiles. They are updated, where applicable, on an annual basis. More detailed information for some of the tables is available on a sub-regional basis. For further information, please contact the Labour and Social Statistics Section at (250) 356-7870 or by fax at (250) 387-0380.

PUBLICATION

A complete set of Socio-Economic Profiles is available in a separate publication, which includes all 28 Regional Districts and a statistical appendix providing background tables. It is available from *BC Stats* at a price of $200 plus GST. The publication is updated annually.

Profiles are also available for Local Health Areas and College Regions at www.bcstats.gov.bc.ca. Custom area profiles may be able to be created on a fee-for-service basis. A related set of Socio-Economic Indices is available at bcstats.gov.bc.ca. These provide regional comparisons of relative socio-economic well being.

DIMENSIONS OF THE REGIONAL ECONOMY

1. **CENSUS OF AGRICULTURE**

   A selection of items from the current Census for the Regional District and for the Development Region and British Columbia.

2. **REGIONAL TOURISM**

   Room rental expenditures based on the Provincial Hotel / Motel Room Tax.

3. **BUSINESS REGISTER ESTABLISHMENT COUNTS**

   The number and types of businesses in an area are a measure of the depth of the economy. But business resists measurement. Any number of businesses may occupy a single location. A business may be inactive, home based, or operating under a variety of different names. So various measures of business do not agree even on the number of establishments.

4. **MAJOR PROJECTS INVENTORY**

   A review of the associated Development Region's capital spending projects underway or in the pipeline.

5. **LABOUR FORCE BY INDUSTRY**

   A breakdown of the experienced labour force according to major industry groupings, based on the Census of Population and Housing.

6. **MANUFACTURING STATISTICS**

   Manufacturing establishments, production & shipments, value added, total employees & salaries.

   Complete listings of manufacturing firms are available on-line at

www.made-in-bc.ca

SECTION F DIMENSIONS OF THE REGIONAL ECONOMY

CHAPTER 1 CENSUS OF AGRICULTURE

Virtually every area of British Columbia supports some agricultural activity, from vegetables and berries in the Lower Mainland, tree fruits in the Okanagan, livestock in the interior, and grains in the northeast. Food production, processing, distribution, and sales are estimated to employ more than 200,000 people. Not only are there opportunities in the food industry itself, but the industry is a large consumer of goods and services.

SOURCE OF INFORMATION

Every five years in conjunction with the population Census, Statistics Canada surveys agricultural activity in Canada. Every agricultural holding with sales over $250 was included. From this survey it is possible to find out the number of farms by size, age of operator, crops grown, area of greenhouses, numbers of animals and poultry, fertilizing, spraying and dusting activity, irrigation and drainage, types of farm machinery, capital values and farm operating expenditures. Data is available at a small area level (refer to Census Subdivision maps at the beginning of the Profile).

ADDITIONAL INFORMATION AVAILABLE

In addition to the variables displayed on the following tables, many additional breakouts are available.

TECHNICAL NOTES

Note asterisks on area descriptions. These indicate data grouped together to protect confidentiality of individual respondents. Footnotes appear at the end of the tables.

OTHER RELATED DATA

Statistics Canada, the B.C. Ministry of Agriculture, Fisheries and Food, and Agriculture Canada produce data. Agriculture Canada publishes price data on a current basis for many products. It also produces special reports such as CONSUMER FOOD TRENDS FOR THE 1990'S which looks at the consumer market place and may offer insights to both growers and processors. Statistics Canada publishes a variety of reports, annually or more frequently of agriculture production, usually for the province as a whole. Annual studies include "The Greenhouse Industry" and "The Survey of Canadian Nursery Trades". The provincial Ministry publishes "Annual Statistics" covering information from all sources and includes as well regional crop production numbers for British Columbia. The website address is http://www/agf/gov.bc.ca. Another interesting website for agriculture market information is http://farmcentre.com/bc/

Notes: 1 acre = 0.4046856 hectares
1 hectare = 2.471 acres

Includes Skeena-Queen Charlotte

CHAPTER 2 REGIONAL TOURISM

Tourism is fast becoming a significant employer in many communities. The World Travel & Tourism Council says it's the world's biggest industry, generating US $3.0 trillion and employing 112 million people, about 1 in every 15 jobs. In British Columbia in 2001, total visitor entries edged down 3.9% to 8.3 million. Asian residents accounted for 51.6% of total overseas trips to BC. American travelers took 6.9 million trips to Canada via BC.

TOURISM SECTOR MONITOR

Data supplied by Consumer Taxation Branch, Ministry of Finance and Corporate Relations from the Hotel Room Tax database. Information includes number of facilities, number of rooms, and total room sales by accommodation type for the development regions. Also includes visitor entries, airport and ferry traffic, restaurant receipts, ocupancy rate and average room rate at hotels. Updated monthly.

OTHER RELATED DATA

The B.C. Ministry of Small Business, Tourism and Culture has commissioned studies of tourism facilities where there may be development potential. In recent years these have included Guest Ranches, Fishing Lodges, Golf Courses, Small Ship Cruising, Marine Tourism, Outfitters, Ski Facilities, and Wildlife Viewing. Staff in the Tourism Product Development and Implementation Group of that Ministry may be of assistance to persons looking at the feasibility for resort development (Phone Enquiry BC in Victoria (250) 387-6121, Vancouver (604) 660-2421, elsewhere in BC 1-800-663-7867). The B.C. Ministry of Environment, Lands and Parks publishes information annually on provincial parks facilities and use. Parks has also done several studies on outdoor recreation and camping trends. The federal Canadian Tourism Commission (http://www.canadatourism.com) has published a series of reports under the general heading "Pleasure Travel Markets". These studies, done abroad, have researched the travel interests of foreigners, their interest in Canada, the types of trips desired, how they travel, the media from which they are most likely to pick up travel information. Statistics Canada routinely measures foreign visitors entering Canada by province and Canadians returning from abroad. Individual entry point information is available through Statistics Canada (contact the Regional Office at 604-666-3691/1-800-263-1136). Supplementary surveys looks at reasons for travel, length of stay, expenditures, and type of transportation. Many other agencies gather together tourism data - some do original research (Tourism Vancouver) phone (604) 682-2222 and Tourism Victoria ((250) 414-6999).

SECTION F DIMENSIONS OF THE REGIONAL ECONOMY

CHAPTER 3 BUSINESS REGISTER ESTABLISHMENT COUNTS

The size and nature of business activity in an area is of interest too most entrepreneurs. Knowing the extent of competition or the potential customer base gives an advantage to business planning. Businesses are hard to track with the many jurisdictions involved. They change their names and their ownership; many are becoming more diversified, others more specialized. Often the local phone book Yellow Pages will be a useful source of information. Several commercial firms sell mailing lists. This section offers counts of firms by industry.

B.C. ESTABLISHMENTS BY EMPLOYMENT SIZE GROUPS

SOURCE OF INFORMATION

These figures are provided from STATISTICS CANADA'S BUSINESS REGISTER. Statistics Canada uses Canada Customs and Revenue Agency (formerly Revenue Canada) records and other means of keeping track of businesses.

DATA

Establishments are the smallest entity that can report basic data (e.g. employment, payroll, sales etc.) to Statistics Canada. Although usually a single location, in some instances businesses report only for their total operations. Areas particularly affected are the financial industries and government. Counts probably underestimate the total number of businesses. Data is available only at the Province and Regional District levels. Smaller areas maybe obtained directly from Statistics Canada. Updates are normally produced each year.

SIC

The Standard Industrial Classification (SIC) is system of standard definitions of business activity and classification of businesses based on their major activity. Refer to Statistics Canada's "STANDARD INDUSTRIAL CLASSIFICATION 1980" manual for descriptions of the SIC's.

Notice to users outside the B.C. Government

Due to copyright, we are no longer able to include information more detailed than **industry division** from the *Business Register*. Industry division codes are a single alphabetic character: A through R. Depending on the diversity of economic activity in an area, there may be as many as a thousand detailed industries for which establishment counts are reported. If you wish to **purchase** the more detailed data, please contact:

Establishment Count by Employment Size

—December 2001—

One of the most frequently asked questions, "How many businesses are there in British Columbia?" cannot be answered without reference to statistical terms. In this report we are not counting unique businesses, but the number of statistical business establishments in British Columbia. Each establishment is reported by their industry sector, as defined by the North American Industry Classification System - Canada 1997 (NAICS), and by the number of paid employees, as represented by an employee size-range group.

Establishment

A statistical business establishment is the smallest accounting entity that can report certain financial data. Producing units are described as establishments when the business maintains records about their activities from which it is possible to compile information about the value of their output, material and service inputs and the extent to which labour and capital were used in the production of output. Complex organizations can contain a number of establishments. Included in this report are all establishments whether or not they have paid employees. Business establishments without employees on the payroll, but who may employ part-time employees, contract workers, family members, or owner/operators (self-employed) are grouped in an "indeterminate" category, but are identified here as "'establishments with No Employees."

NAICS

The industry classification used is Statistics Canada's NAICS (Canada 1997). This system structures industrial activity by hierarchically grouping producing units according to similarity in the production processes used to produce goods and services. The following graphically represents the structure of this hierarchy:

	NAICS Code
XX Sector	2 numeric digits
XXX Sub-sector	3 numeric digits
XXXX Industry Group	4 numeric digits
XXXXXX Industry	6 numeric digits

Users requiring detailed knowledge of NAICS are directed to Statistics Canada's site, specifically to:
http://www.statcan.ca/english/Subjects/Standard/index.htm
The following data is derived from Statistics Canada's Business Register, and is available for British Columbia, B.C. Census Divisions (equivalent to B.C. Regional Districts) and B.C. Development Regions. Data for B.C. at the 4 and 6-digit levels, and subprovincial data at the 3, 4, and 6-digit levels are available from Statistics Canada. Geographic boundaries for Regional Districts are based on the 1996 Census geography. If you require further information, please contact us at the address below.

SECTION F DIMENSIONS OF THE REGIONAL ECONOMY

CHAPTER 4 MAJOR PROJECTS INVENTORY

Major capital projects mean not only jobs and a demand for materials during the construction phase, but usually also mean increased economic activity in an area. That may lead to permanent jobs, families moving into the area, and the spin-off effect that will create.

SOURCE OF INFORMATION

This report is produced quarterly under a joint private and public partnership with **Jackie Hamilton & Associates** and **BC Stats** in Victoria. For users wishing to obtain more current information, a quarterly subscription service to the publication MAJOR PROJECTS INVENTORY, covering all of British Columbia is available from **BC Stats**, PO Box 9410 Stn Prov Govt, Victoria, B.C. V8W 9V1 for $75 plus GST.

TECHNICAL NOTES

Projects are listed by status (i.e. proposed, under construction and completed). Capital expenditures are expressed in current dollars unless otherwise indicated. A "Major" project is defined as one costing $20 million or more in Greater Vancouver or $15 million or more elsewhere in the Province. However, smaller projects of regional significance may be included.

CAUTION

Although every effort is made to verify accuracy, the information is gathered from several sources and especially in the early phases of a project, may be approximate. Where start and finish date are indicated by a "?", the project is not sufficiently advanced to provide determinate dates.

North Coast Development Region

Updated January 15, 2003
BC STATS
Ministry of Management Services
Tel : (250) 387-0327   Fax: (250) 387-0329

REGION AT A GLANCE

Physical Geography : Diverse island, coastal and mountainous terrain.

Land Area in Sq. km. : 111,937

Population Density / Sq. km. (2002) : 0.6

Economic Base : Forestry and forest based manufacturing, mining and mineral processing, fishing.

Selected Demographic Characteristics

STATUS: PROPOSED

Kitimat

Eurocan Power Project, Eurocan Pulp and Paper Ph: (604) 895-2700
New generation of 200 gigawatt hours of electricity at the pulp and paper mill using wood residue and natural gas. Project has been short listed by BC Hydro for possible acceptance under it's customer based generation program.

Status: Proposed Start: ?
Est. Cost ($ million): 60 Finish: ?
First Entry: Dec 2002

Masset

Nai-Kun Wind Power Project, Haida Gwaii Ph: (250) 559-4496
Proposed 700 MW wind power project on the Queen Charlotte Islands. In early planning stages.

Status: Proposed Start: ?
Est. Cost ($ million): 1000 Finish: ?
First Entry: Jun 2002 Last Update: Dec 2002

Masset

Qay'llnagaay Heritage Centre, Skidegate Band Council
Ph: (250) 559-4496
Proposed development of four structures for a total of 120,000 sq ft at the south end of Graham Island in the Queen Charlotte Islands. The heritage centre will include a performing arts centre, interpretive centre, teaching centre, gift shop, canoe shed and an expanded museum and will be laid out to represent a traditional Haida Village. The development will also include a 28-room destination lodge and a restaurant. Federal Funding as been approved. Design work has commenced.

Status: Proposed Start: Early 2003
Est. Cost ($ million): 25 Finish: Late 2004
First Entry: Dec 2001 Last Update: Jun 2002

Prince Rupert

Tsimshian Access Project, Prince Rupert City Ph: (250) 627-0931
Proposed construction of bridges to link Kaien Island, Digby Island and the Tsimshian Peninsula, to connect the City of Prince Rupert with the airport and several native villages. Bridge user-fees are expected to recover partial costs of the project. Memorandum of understanding to be completed by provincial and federal governments, the city of Prince Rupert and two native bands. Then a phased approach to route selection and design will occur. In the development and planning stages. Business plan to be completed Winter 2003.

Status: Proposed Start: 2004
Est. Cost ($ million): 130 Finish: 2005
First Entry: Sep 1998 Last Update: Dec 2002

Stewart Region

Forrest Kerr Water Power Project, Coast Mountain Power
Ph: (604) 929-3961
Proposed 80-megawatt run-of-river electricity generation project on the Iskut River. Submitted for review under the BC Environmental Assessment Act in June 2002. Review expected to be completed in spring 2003.

Status: Proposed Start: Summer 2003
Est. Cost ($ million): 120 Finish: Fall 2004
First Entry: Sep 2001 Last Update: Dec 2002

STATUS: ON HOLD

Iskut

Red Chris Copper Project, American Bullion Ph: (604) 684-1704
Proposed mine containing reserves of 263 million tonnes of copper and gold. American Bullion seeking sale of the property. Current mill design will process 8,000 tonnes/day to expand to 24,000 tonnes/day.. Concentrate to be shipped to smelter in the Pacific Rim via Stewart. Camp for 250-300 persons to be located onsite. Estimated 300 construction jobs. Project application was reviewed under the Environmental Assessment process; awaiting Project Report from proponent. Reassessing size of project.

Status: On hold Start: ?
Est. Cost ($ million): 300 Finish: ?
First Entry: Sep 1997 Last Update: Sep 2002

Kitimat

Dredging Project - Hydroelectric Improvements,
Alcan Ph: (250) 639-8000
Proposal to dredge the Tahtsa Reach Narrows in a 3.3 km channel to increase hydroelectric generating capacity from the Nechako reservoir. Public information sessions held and government approvals applied for. Project is on hold. Alcan is doing an internal company review to determine if they want to proceed in 2003.

Status: On hold Start: Spring 2003
Est. Cost ($ million): 35 Finish: Fall 2004
First Entry: Jun 2001 Last Update: Sep 2002

Prince Rupert

Sulphur Export Terminal, Sulphur Corp. of Canada Ph: (250) 627-7668
Sulphur export terminal projected to ship up to one million tonnes per year, mostly to Asian and Pacific Rim customers. The terminal will use existing berthing facilities and shiploaders at Ridley Terminals Inc. Sulphur to be shipped in both molten state and in formed format. Phase 2: 70,000-sq ft to facilitate transfer of formed sulphur to storage tanks is currently on hold.

Status: On hold Start: Fall 2003
Est. Cost ($ million): 20 Finish: 2004
First Entry: Dec 1998 Last Update: Sep 2002

Prince Rupert

BC Iron and SteelWorks, Pacific Iron & Steel Products Ltd.
Ph: (604) 682-6199
Proposed plant for production output of 1.5 million tonnes per year of steel slabs for export to Asian and U.S markets. Approximately 1000 construction jobs are anticipated and 350 direct jobs when the plant is in production. Project is on hold.

Status: On hold Start: ?
Est. Cost ($ million): 750 Finish: ?
First Entry: Mar 1998 Last Update: Dec 2002

Stewart region

Bronson Slope Copper/Gold/Silver/Molybdenum Mine,
Skyline Gold Corporation Ph: (604) 683-6049
Proposed copper, gold, silver and molybdenum mine in the Iskut Valley north of Stewart. Estimated 250 construction jobs and 115 operating jobs for 14 years based on mineable reserves of 224 million tonnes. Project includes construction of a 12,000 tonne per day mill facility to process ore, access roads, rock and tailings facilities and camp facilities. Review under the Environmental Assessment Act was withdrawn.

Status: On hold Start: ?
Est. Cost ($ million): 130 Finish: ?
First Entry: Dec 1997 Last Update: Dec 2002

6. North Coast

Stewart, 120 km north

Isk Wollastonite Mine, Whitegold Resources
Proposed surface wollastonite mine 120 km. north of Stewart. Project currently on-hold.

Status: On hold
Est. Cost ($ million): 15
First Entry: Sep 1997
Start: ?
Finish: ?
Last Update: Sep 2002

STATUS: UNDER CONSTRUCTION

Greenville

Nisga'a Highway Improvements, BC Ministry of Transportation & Highways Ph: (250) 615-3120 (Project Office)
Reconstruction and paving of 92 km of the Nisga'a Highway from Sand Lake located 63 km north of Terrace to Greenville to New Aiyansh and Nall Camp. The highway will be upgraded from gravel to two lanes. The project will be done in seven phases. Phase 1: Sand Lake to the south end of Lava Lake (approx.5 km) completed. Phase 2: south to north end of Lava Lake (approx.10.7 km) construction by Emil Anderson Contracting has commenced and will continue until March 2003. The project is part of the Nisga'a Treaty agreement.

Status: Under Construction
Est. Cost ($ million): 52
First Entry: Dec 1998
Start: Summer 1999
Finish: Summer 2005
Last Update: Jun 2002

SECTION F DIMENSIONS OF THE REGIONAL ECONOMY

CHAPTER 5 LABOUR FORCE BY INDUSTRY

The composition of a local economy can be viewed from the perspective of the type of industrial activity, which occurs in the area. One such measure is a breakdown of the labour force by industrial sector. It provides information on the nature of a local economy such as whether or not it is dependent on resource industries such as forestry and mining, for most of its employment and income, or whether the area has a diversified economic base with most of its labour force in service producing industries.

SOURCE OF INFORMATION

This report is produced from information obtained from the Census of Population and Housing conducted by Statistics Canada. A more detailed—four digit 1980 S.I.C. (Standard Industrial Classification), industrial breakdown can be obtained for a fee, by the Vancouver regional office of Statistics Canada (666-3691 in Vancouver or 1-800-263-1136 toll-free within B.C.).

TECHNICAL NOTES

This table is based on the experienced labour force. The experienced labour force is defined as persons who, during a reference period established prior to the Census, were employed or unemployed.

Data is presented for all incorporated municipalities in the Regional District as well as for unincorporated Census subdivisions (shown by letters "A", "B", "C" etc). Data is not shown for Indian reserves.

The experienced labour force is shown by place of residence, not by place of work.

CHAPTER 6 MANUFACTURING STATISTICS

Manufacturing activity is one indicator of the strength of the goods producing sector in an area. These statistics will show the number of manufacturing establishments, the cost of production, the value of shipments, value added, the number of employees and total salaries.

SOURCE OF INFORMATION

This report is produced from information obtained from the Survey of Manufactures, conducted by Statistics Canada.

TECHNICAL NOTES

Establishment: The smallest unit capable of reporting certain specified input and output data, usually a plant or mill.

Value of shipments: Net selling value of goods make by reporting establishment, or for its account, from its own materials.

Value added: The value added is a measure of net output, that is, of gross output less those purchased iputs (cost of materials and supplies; cost of fuel and electricity) which have been embodied in the value of the product.

The data in this report is now classified according to (NAICS) the North American Industrial Classification System. The reporting period covers any fiscal year ending not earlier than April 1 of the reference years nor later than March 31 the following year.
